Jasper Knight, Christian M. Rogerson

2014 Question Paper Of Economics In Gauteng:

Promoting sustainable local economic development initiatives Marius Venter, 2022 This book endeavours to outline case studies that promote sustainable Local Economic Development LED initiatives It is generally believed that local governments are the foot soldiers of LED However this seems to be a myth as local governments in South Africa and elsewhere have not yet fulfilled this mandate and have been struggling for several years to implement LED initiatives The distinctive merit of this book lies in the way it combines the South African context with the wider international development context in ways that there is a flow of information and ideas both ways The book is an essential part of this sequence of ideas development and action at a critical time for strategic action directed at a sustainable future It showcases case studies and responses to the impacts of globalisation as a bridge between urban rural and institutional action and reveals avenues for local government leadership in communities research student engagement and wider interactions

Contemporary South Africa and the Political Economy of Regional Development Methembe Mdlalose, Isaac Khambule, Nene Ernest Khalema, 2025-02-21

South Africa's struggle in balancing its domestic needs while playing a dynamic developmental role in the African region and global context exposes a complex web of relations shaped by its geostrategic location on the continent and the world and the staggering legacies of colonialism and apartheid As such understanding the complexities of the global economy and of South Africa's place in it is of great importance This book builds upon an existing body of literature which has demonstrated that while the post apartheid South African state has recast its nation building goals with advances having been made notably in the area of a stellar post apartheid constitution policy directives and democratic political integration economic integration and policy implementation presents a projection of captured interests where big business concerns are entrenched in the post apartheid state's apparent neo liberal turn The main focus of the book is to contextualise issues relating to three main trends in global discourses on development which are significant for South Africa and indeed for the study of the political economy of regional development in the country from the prism of South Africa as a global capitalist state These trends include the impact of globalisation regionalisation and the marginalisation of South Africa and indeed the African continent in the global economy thus unpacking the possible role that South Africa might play in regional development This volume will be a valuable resource to academics researchers and students in the fields of regional studies economics and political theory as well as policymakers planners and local economic development practitioners

The Geography of South Africa Jasper Knight, Christian M. Rogerson, 2018-10-03 This edited collection examines contemporary directions in geographical research on South Africa It encompasses a cross section of selected themes of critical importance not only to the discipline of Geography in South Africa but also of relevance to other areas of the Global South All chapters are original contributions providing a state of the art research baseline on key themes in physical human and environmental geography and in understanding the changing geographical landscapes of modern South Africa These contributions set the scene for an

understanding of the relationships between modern South Africa and the wider contemporary world including issues of sustainable development and growth in the Global South *ICIE 2015 3rd International Conference on Innovation and Entrepreneurship* Deresh Ramjugernath, 2015-02-24 These proceedings represent the work of researchers participating in the 3rd International Conference on Innovation and Entrepreneurship ICIE 2015 which is being co hosted by The University of KwaZulu Natal Durban and the Ethekwini Municipality Durban South Africa on the 19 20 March 2015 The ICIE Conference constitutes a valuable platform for individuals to present their research findings display their work in progress and discuss conceptual advances in many different branches of innovation and entrepreneurship in business and management At the same time it provides an important opportunity for researchers and managers to come together with peers share knowledge and exchange ideas ICIE builds on the now well established European Conference on Innovation and Entrepreneurship and allows universities outside the European Boundaries the opportunity to host an academic conference on these important topics In addition to the presentations of research the conference will feature a knowledge cafe led by Dr Shawren Singh looking at this topic How can academics focus research efforts to better serve the business and public sector communities The second day will open with a panel discussion looking at Smart cities Opportunities for Entrepreneurship and Economic growth Following an initial submission of 85 abstracts that have undergone a double blind peer review process 26 research papers 3 PhD research papers 2 work in progress papers are published in these Conference Proceedings representing research results from the Czech Republic Denmark Italy Kazakhstan Kenya Lithuania Nigeria Poland Saudi Arabia South Africa Sweden The Netherlands UK USA and Zambia **Journal of Economic Literature** ,2014 **Towards more effective collaboration by higher education institutions for greater regional development in the Gauteng City-Region** Robert Bergman, 2014-11-19 Higher education institutions HEIs in the Gauteng City Region GCR and elsewhere are increasingly being called upon to do more than their traditional roles of teaching and research They are now expected to collaborate and engage with other stakeholders with a view to contributing directly and indirectly to social and economic development in their localities Such an orientation includes having HEIs actively fostering public private partnerships and other initiatives that enhance equitable regional development The adoption of such a focus has implications for all aspects of these institutions activities as well as for the policy and regulatory framework in which they operate This Occasional Paper reflects critically on the role of HEIs in regional development It surveys current debates on the matter and draws out some of the implications on how we ought to think further about the current state of government industryacademia interaction and collaboration for development in the GCR It is motivated by an awareness of the increasing importance of higher education in the regional development discourse alongside a body of international theory and practice on the contribution of HEIs to regional development A cornerstone of this body of literature is the so called triple helix framework within which government industry and academia work intimately intensely and collaboratively towards a common vision of regional development

Within this framework HEIs are considered to be a public good that must play a large meaningful and relevant role in the development and improvement of the cities and regions where they are located ^{1 2} They do not and cannot stand completely outside the realities of their geographic social cultural and political environment The intended audience for this report extends beyond academics and HEI administrators to include government officials business and labour leaders civil society and citizens because a discussion on stimulating and improving the GCR must be much more than an academic exercise The collaboration that is essential to regional development requires stakeholders to be familiar with a wide spectrum of issues of importance to individual constituencies Each constituency must add value and insight to the discussion by drawing on their specific knowledge experience and self interests Establishing this common ground is fundamental to initiating meaningful debate about what the GCR can and should be and how regional HEIs can work more collaboratively creatively and effectively to improve and advance the region
