The Problem of Social Inequality Scott G. McNall, 2015-12-07 Within and among nations rising levels of social inequality threaten our collective future. Currently upwards of 80% of people's life chances are determined by factors over which they have absolutely no control. Social inequality threatens the democratic project because it destroys the trust on which governments depend and it gives rise to corrupt political and economic institutions. How can we get out of the traps we have created for ourselves? We need to reboot capitalism. Drawing on diverse examples from a range of countries, McNall explains the social, economic, and ecological traps we have set for ourselves and develops a set of rules of resilience that are necessary conditions for the creation and maintenance of democratic societies and a set of rules essential for creating a sustainable future.

Learning Technologies and Globalization Nada Dabbagh, Angela D. Benson, André Denham, Roberto Joseph, Maha Al-Freih, Ghania Zgheib, Helen Fake, Zhetao Guo, 2015-10-16 This brief describes the evolutionary and global impact of the techno-social transformation on learning technologies in terms of emerging pedagogical frameworks and applications. It provides examples of such applications in higher education, K-12, and the workplace across the globe. The transformation and diffusion of ICT into an ever-present and accessible phenomenon is fundamentally shaping human activity and culture, changing human identity and redefining globalization. Global activities have widened, intensified, and accelerated as a result of ICT integration, generating a new awareness of the world as a techno-social environment. This emergent global environment is introducing unprecedented socio-economic opportunities; however, it is also bringing new risks and challenges, particularly as this relates to learning technologies, most especially in higher education contexts.

Off to College Roger H. Martin, 2015-08-04 What should parents expect during their child's first year of college? Roger Martin, double president emeritus of two colleges, spent a year visiting five diverse colleges: public and private, large and small, elite and non-elite, in order to offer the parents of college-bound seniors a comprehensive overview of the first-year college experience. In addition to a stint with dorm life and time with students and professors, Martin draws from conversations with a wide variety of campus administrators and staff members in financial aid, campus police, sports, health care, and disabilities accommodations. We join Martin, for example, as he and a campus safety officer walk around campus on a busy Saturday night. While *Off to College* deals with more traditional topics such as the financial challenges of college, homesickness, and time management, it also tackles more complex

contemporary issues that college freshman may encounter There are sections devoted to date rape drinking campus shootings and depression as well as chapters targeted at athletes minorities and first generation students We can boast in this book not only a most appropriate and uniquely positioned author but also one full of information and good advice from campus sources Off to College promises to be an encouraging and extremely well informed guide for any parent sending their child off to a four year residential college

Unbounding Europe Ilaria Giglioli,2025-09-15 At a time of global border fortification and rising nationalisms Unbounding Europe analyzes the potential of Mediterranean borderlands to offer alternative models of belonging Drawing on ethnographic and archival research Ilaria Giglioli writes about relations between Sicilians and Tunisians and how they negotiate relationships of proximity and difference in multiple arenas of life She argues that histories of marginalization within the nation state do not automatically make borderlands inclusive for migrants Understanding the interplay of different degrees of marginality is key to identify how solidarity movements can emerge and be effective Giglioli argues that depoliticized celebrations of cross Mediterranean coexistence ignore longstanding inequalities and reinforce symbolic hierarchies between Sicilians and Tunisians She stresses that recognizing and addressing these inequalities is key to developing a transformative politics of solidarity Rather than idealize intermediate border spaces or subjects Unbounding Europe asserts that it is more effective to reconstruct histories of material and symbolic boundary drawing to demonstrate the contingency and mutability of borders

Dilemmas of Educational Ethics Meira Levinson,Jacob Fay,2019-01-02 Educators and policy makers confront challenging questions of ethics justice and equity on a regular basis Should teachers retain a struggling student if it means she will most certainly drop out Should an assignment plan favor middle class families if it means strengthening the school system for all These everyday dilemmas are both utterly ordinary and immensely challenging yet there are few opportunities and resources to help educators think through the ethical issues at stake Drawing on research and methods developed in the Justice in Schools project at the Harvard Graduate School of Education Dilemmas of Educational Ethics introduces a new interdisciplinary approach to achieving practical wisdom in

education one that honors the complexities inherent in educational decision making and encourages open discussion of the values and principles we should collectively be trying to realize in educational policy and practice At the heart of the book are six richly described realistic accounts of ethical dilemmas that have arisen in education in recent years paired with responses written by noted philosophers empirical researchers policy makers and practitioners including Pedro Noguera Howard Gardner Mary Pattillo Andres A Alonso Jamie Ahlberg Toby N Romer and Michael J Petrilli The editors illustrate how readers can use and adapt these cases and commentaries in schools and other settings in order to reach a difficult decision deepen their own understanding or to build teams around shared values

Congressional Record , **Women After All**

Melvin Konner, 2015-03-02 A sparkling thought provoking account of sexual differences Whether you're a man or a woman you'll find his conclusions gripping Jared Diamond There is a human genetic fluke that is surprisingly common due to a change in a key pair of chromosomes In the normal condition the two look the same but in this disorder one is malformed and shrunk beyond recognition The result is a shortened life span higher mortality at all ages an inability to reproduce premature hair loss and brain defects variously resulting in attention deficit hyperactivity conduct disorder hypersexuality and an enormous excess of both outward and self directed aggression It is called maleness Melvin Konner traces the arc of evolution to explain the relationships between women and men With patience and wit he explores the knotty question of whether men are necessary in the biological destiny of the human race He draws on multiple colorful examples from the natural world such as the mating habits of the octopus black widow angler fish and jacana and argues that maleness in humans is hardly necessary to the survival of the species In characteristically humorous and engaging prose Konner sheds light on our biologically different identities while noting the poignant exceptions that challenge the male female divide We meet hunter gatherers such as those in Botswana whose culture gave women a prominent place invented the working mother and respected women's voices around the fire Recent human history has upset this balance as a dense world of war fostered extreme male dominance But our species has been recovering over the past two centuries and an unstoppable move toward equality is afoot It will not be the end of men but it will be the end of male supremacy and a better wiser world for women and men alike

The Bill Gates Problem Tim Schwab, 2023-11-16 A NEW YORK TIMES EDITORS CHOICE

Nobody who comes away from reading *The Bill Gates Problem* will look at him in the same way. The Times You know him as the founder of Microsoft, the philanthropic, kind-hearted billionaire who has donated endless funds to good causes around the world. But there's another side to Bill Gates. In this fearless groundbreaking investigation, Tim Schwab offers readers a counter narrative, one where Gates has used his monopolistic approach in business to amass a stunning level of control over public policy, scientific research, and the news media. Whether he is pushing new educational standards in America, health reforms in India, or industrialized agriculture in Africa, Gates's unbridled social experimentation has shown itself to be not only undemocratic but also ineffective. All of which begs the question: why should the super rich be able to transform their wealth into political power, and just how far can they go?

An extraordinary and detailed work of investigative journalism. The Telegraph
