Generation Jobless? P. Vogel, 2015-03-05 Offering guidance on the opportunities and threats for future generations and featuring interviews with business leaders this book provides a constructive look at change. It directs the youth to become job creators not job seekers and to approach the corporate and political worlds with an entrepreneurial mind set **College Disrupted** Ryan Craig, 2025-09-23 For nearly two decades pundits have been predicting the demise of higher education in the United States. Our colleges and universities will soon find themselves competing for students with universities from around the world. With the advent of massive open online courses (MOOCs) over the past two years, predictions that higher education will be the next industry to undergo disruption have become more frequent and fervent. Currently, a university's reputation relies heavily on the four Rs in which the most elite schools thrive: rankings, research, real estate, and rah i e sports. But for the majority of students who are not attending these elite institutions, the four Rs offer poor value for the expense of a college education. Craig sees the future of higher education in online degrees that unbundle course offerings to offer a true bottom line return for the majority of students in terms of graduation, employment, and wages. *College Disrupted* details the changes that American higher education will undergo, including the transformation from packaged courses and degrees to truly unbundled course offerings along with those that it will not. Written by a professional at the only investment firm focused on the higher education market, *College Disrupted* takes a creative view of the forces roiling higher education and the likely outcome, including light-hearted real-life anecdotes that illustrate the author's points. The Geneva Papers Christophe Courbage, 2016-04-29 In January 1976 Raymond Barre, the first President of The Geneva Association and Orio Giarini, its first Secretary General, founded The Geneva Papers on Risk and Insurance with the main goal of supporting and encouraging research in the economics of risk and insurance. At that time, research in the field of insurance was still embryonic and insurance was regarded as peripheral social activity. When sustained economic growth gained traction, the function of insurance gradually emerged as a key contributor to economic development. By integrating uncertainty into economic theory and benefiting from the progress of both financial economics and decision theory, research developed further in the field of insurance economics and risk management and is now prolific. The Geneva Papers on Risk and Insurance undeniably contributed to this evolution, and its impact on research in insurance has largely exceeded what its two founding members could have expected. This volume is a special collection of papers celebrating 40 Years of The Geneva Papers on Risk and Insurance. The collection looks back at the storied history of The Geneva Papers on Risk and Insurance and features papers from some of the esteemed authors who have contributed to the journal in its lifetime. This collection of papers highlights just a few of the many themes addressed in the papers published by the journal since it was created. Nevertheless, the selection exemplifies the richness and variety of topics the field of insurance covers. **Mobile Broadband Communications for Public Safety** Ramon Ferrús, Oriol Sallent, 2015-10-12 This book provides a timely and
