7th International Conference on Tourism Research Prof Rishi Balkaran, Dr Chris Hattingh, 2024-03-18 These proceedings represent the work of contributors to the 7th International Conference on Tourism Research ICTR 2024 hosted by the Centre for Tourism Research in Africa at the Cape Town Hotel School Cape Peninsula University of Technology South Africa on 18-19 March 2024. The Conference Chair is Prof Rishi Balkaran and the Programme Chair is Dr Chris Hattingh, both from Cape Peninsula University of Technology CPUT South Africa. ICTR is a well-established event on the academic research calendar and now in its 7th year, the key aim remains the opportunity for participants to share ideas and meet the people who hold them. The scope of papers will ensure an interesting two days. The subjects covered illustrate the wide range of topics that fall into this important and ever-growing area of research. Today more than ever there is a need for research and scientific guidance as the tourist sector struggles to cope with the consequences of the Covid-19 pandemic, inflation, socio-political turbulences, climate change, and disaster risk. Mathematics (Education) in the Information Age Stacy A. Costa, Marcel Danesi, Dragana Martinovic, 2020-12-10 This book brings together ideas from experts in cognitive science, mathematics, and mathematics education to discuss these issues and to present research on how mathematics and its learning and teaching are evolving in the Information Age. Given the ever-broadening trends in Artificial Intelligence and the processing of information, generally the aim is to assess their implications for how math is evolving and how math should now be taught to a generation that has been reared in the Information Age. It will also look at the ever-spreading assumption that human intelligence may not be unique, an idea that dovetails with current philosophies of mind such as posthumanism and transhumanism. The role of technology in human evolution has become critical in the contemporary world. Therefore, a subgoal of this book is to illuminate how humans now use their sophisticated technologies to chart cognitive and social progress. Given the interdisciplinary nature of the chapters, this will be of interest to all kinds of readers: from mathematicians themselves working increasingly with computer scientists to cognitive scientists who carry out research on mathematics cognition and teachers of mathematics in a classroom. Towards a holistic approach to support learners at risk of interrupted development Macalane J. Malindi, Johnnie Hay, Thabo Makhalemele, 2024-02-23 The COVID-19 pandemic and the restrictions that came with it led to unprecedented disruptions in learner development and put them at risk of poor developmental outcomes. It is thus important that the extent of the disruption on their development and the support needs of learners be investigated. Researching the impact of the disruption should focus on holistic development. In this book, the authors use multiple research approaches and methods of gathering data in their respective fields to examine the impact of the disruption and determine the support needs of learners. Data gathered through the different methods are processed, and findings are presented. The findings have implications for both practice and future research in the fields of inclusive education, learner support, educational psychology, movement education, Life Orientation, and curriculum development.

Leong, Sumaya Laher, Mingjie Zhou, Kexin Wang, 2023-02-07 Perception-based Marketing of Parishes using the example of Catholic Academics and Students Thomas Peters, 2019-03-28 The Roman Catholic Church in Germany is faced with an increasingly pluralistic and secularized society that further precipitates the decline in

membership that has been ongoing already since the 1970s through instances of aging population and church leavings and has been causing at the level of locally and regionally operating parishes and their establishments a growing shortage of personnel and other resources Here a marketing communication that is based on target group specific perception can be useful to remedy the situation in that the religious and social offers as well as the personal and media appearance of parishes are adjusted to population groups that credit to their socioeconomic potentials are able to substantially contribute to building social capital in church contexts Particularly Catholic Academics with high affinity to the Church make their comprehensive individual professional and financial resources available more frequently and more consistently for voluntary engagements than the majority of the German population A group that positively engages to great extent is that of those students and Academics who are organized in Catholic student fraternities or associations and their local institutions A targeted involvement of this small but high resourced population group in local church activities can be a substantial and existential aid for the Catholic Church in Germany and sustain its further development This is explored and discussed on the example of the largest academic association in Europe Cartel Confederation of the Catholic German Student Associations CV in German Cartellverband der katholischen deutschen Studentenverbindungen and attached specific practical recommendations for parish marketing The Germany based research results can be applied to other European countries such as Austria and Switzerland Furthermore the discussion of results offer a broad range of new perspectives and ideas for church marketing in those countries which have a living culture of denominational student associations *Ebook: Adolescence*

Haden,Thanjuni Pathman,2022-02-21 **Diversity in the United States** Lawrence R. Samuel,2023-06-01 Diversity in the United States A Cultural History of the Past Century is a cultural history of diversity in the United States over the past 100 years Diversity defined here as Americans of different racial ethnic and religious backgrounds is currently very much in the national conversation The book explores diversity in a historical context bringing a much needed perspective on what is a

passionate theme in contemporary American society Told chronologically and divided into five 20 year eras the book sheds new light on the important role that diversity has played in our national identity The subject is parsed through the voices of intellectuals and journalists who have weighed in on its many different dimensions The primary argument of the work is that the concept of diversity has functioned as a key site of both congruence and division in the United States for the past 100 years providing a sense of who we are as a people while at the same time exposing inequities based on race ethnicity and religion Both an academic audience and the many readers of nonfiction will find the book to be a valuable and insightful resource
