Max,Arthur H. Johnson,2018-10-24 This second edition provides extensive information on the attributes of the Natural Gas Hydrate NGH system highlighting opportunities for the innovative use and modification of existing technologies as well as new approaches and technologies that have the potential to dramatically lower the cost of NGH exploration and production Above all the book compares the physical environmental and commercial aspects of the NGH system with those of other gas resources It

subsequently argues and demonstrates that natural gas can provide the least expensive energy during the transition to and possibly within a renewable energy future and that NGH poses the lowest environmental risk of all gas resources. Intended as a non-mathematical descriptive text that should be understandable to non-specialists as well as to engineers concerned with the physical characteristics of NGH reservoirs and their production, the book is written for readers at the university graduate level. It offers a valuable reference guide for environmentalists and the energy community and includes discussions that will be of great interest to energy industry professionals, legislators, administrators, regulators, and all those concerned with energy options and their respective advantages and disadvantages.

Biodesign Paul G. Yock, Stefanos Zenios, Josh Makower, Todd J. Brinton, Uday N. Kumar, F. T. Jay Watkins, Lyn Denend, Thomas M. Krummel, Christine Q. Kurihara, 2015-02-02. This step-by-step guide to medical technology innovation now in full color has been rewritten to reflect recent trends of industry globalization and value-conscious healthcare. Written by a team of medical engineering and business experts, the authors provide a comprehensive resource that leads students, researchers, and entrepreneurs through a proven process for the identification, invention, and implementation of new solutions. Case studies on innovative products from around the world, successes and failures, practical advice, and end-of-chapter 'Getting Started' sections encourage readers to learn from real projects and apply important lessons to their own work. A wealth of additional material supports the book, including a collection of nearly one hundred videos created for the second edition, active links to external websites, supplementary appendices, and timely updates on the companion website at ebiodesign.org. Readers can access this material quickly, easily, and at the most relevant point in the text from within the ebook.

Value Practices in the Life Sciences and Medicine Isabelle Dussauge, Claes-Fredrik Helgesson, Francis Lee, 2015. This book provides a compelling scholarly statement about the interrelation and pliability of values in the life sciences, medicine, and health care. The volume aims to aid our understanding of the roles of power, knowledge production, and economic action in the heavily scientised and economised areas of life science and medicine.

Why We Need the Humanities Donald Drakeman, 2016-02-25. An entrepreneur and educator highlights the surprising influence of humanities scholarship on biomedical research and civil liberties. This spirited defence urges society to support the humanities to obtain continued guidance for public policy decisions and challenges scholars to consider how best to fulfil their role in serving the common good.
