Subject: INFORMATION: Audit Termination Notification: **Date:** September 30, 2014
Security Controls Audit of the Data
Communications Program
Federal Aviation Administration
Project No. 14F3011F000

From: Louis C. King 
Assistant Inspector General for Financial and
Information Technology Audits **Reply to**
Attn. of: JA-20

To: Director, Audit and Evaluation

On May 27, 2014, the Office of Inspector General (OIG) announced an audit of the Federal Aviation Administration's (FAA) security and controls for the Data Communications Program (DataComm). The announced objectives were to determine whether (1) FAA is identifying security risks and properly mitigating them, and (2) FAA's contingency plan for the system limits the effects of the loss of DataComm's availability.

We are terminating this audit. The DataComm system is currently in development and has not yet become operational. Consequently, it does not have a complete security review or contingency plan available for us to test. According to FAA, the DataComm system is scheduled for a security review in June 2015. At that time, we will determine whether to perform this audit.

We appreciate the courtesies and cooperation of FAA representatives during our audit. If you have any questions or would like additional information regarding this terminated audit, please contact me at (202) 366-1407, or Nathan Custer, Program Director, at (202) 366-5540.

In Deep Water Michael Brennan,2019-09-13 Irish Water was set up in 2013 to

introduce the most ambitious water metering programme in the world The plan was to get Irish people to finally pay to upgrade a nineteenth century water system The water metering programme began in August 2013 and was carried out at breakneck speed However it did not go to plan and the issue of water charges divided Ireland There were nationwide demonstrations and confrontations in housing estates involving water meter contractors garda and water charge protesters The programme ended in political disaster with a humiliated government having to send out one million refunds With access to unpublished documents and interviews with the key personalities on both sides In Deep Water provides a blow by blow account of how it all went wrong The rows at cabinet The warnings that went unheeded The water women The smartphone wielding protesters And the minister who threatened to reduce people s water to a trickle Compulsively readable and fast paced In Deep Water gives an inside view of the controversy that divided Ireland

Political Standards Karthik Ramanna,2015-11-09 Prudent verifiable and timely corporate accounting is a bedrock of our modern capitalist system In recent years however the rules that govern corporate accounting have been subtly changed in ways that compromise these core principles to the detriment of the economy at large These changes have been driven by the private agendas of certain corporate special interests aided selectively and sometimes unwittingly by arguments from business academia With Political Standards Karthik Ramanna develops the notion of thin political markets to describe a key problem facing technical rule making in corporate accounting and beyond When standard setting boards attempt to regulate the accounting practices of corporations they must draw on a small pool of qualified experts but those experts almost always have strong commercial interests in the outcome Meanwhile standard setting rarely enjoys much attention from the general public This absence of accountability Ramanna argues allows corporate managers to game the system In the profit maximization framework of modern capitalism the only practicable solution is to reframe managerial norms when participating in thin political markets Political Standards will be an essential resource for understanding how the rules of the game are set whom they inevitably favor and how the process can be changed for a better capitalism

Parliament. House of Commons. Committee of Public Accounts,2016 We acknowledge that Universal Credit has stabilised and made progress since the previous Committee of Public Accounts first reported on the programme in 2013 However there remains a long way to go Implementation of Universal Credit so far has focussed mainly on the simplest cases and the Department for Work Pensions has again delayed the programme The completion date for the roll out of its new digital service is six months later compared to when we looked at the programme only a year ago and the Department now expects that Universal Credit will be fully operational in March 2021 The Office for Budget Responsibility forecasts that there will be a further six month delay beyond the Department s latest planned end date We remain disappointed by the persistent lack of clarity and evasive responses by the Department to our inquiries particularly about the extent and impact of delays The Department s response to the previous Committee s recommendations in the February 2015 report Universal Credit progress update do not convince us that it is committed to improving transparency about the programme s progress **OECD**
