Challenging Ideas Maren Lytje, Torben K. Nielsen, 2016-01-14

Challenging Ideas is a selection of articles which address the intersections between theory and empirical research. In general, the contributions to the volume focus on how imaginations of the temporal relationship between past and present might inform theory as well as empirical research. It is divided into two parts, the first of which *Memory* looks at the memory turn in the discipline of history and includes investigations into the relationship between past and present in the working through of trauma and reflections on the relationship between media memory, collective memory and trauma. The second part of the volume *History* looks at the intersections between social science, political theory and the writing of history. This section includes reflections on how the historian's archival work might inform the construction of social and political theory and explorations of the temporal relationship between past and present at work in the archives. The contributions to this volume encourage historically oriented scholars to approach their work with an active interest in disciplines close to their topic and a reflexive attentiveness to the broader power relations within which they work. They offer different perspectives on the intrinsic relationship between past and present at work in the interactions between theory and empirical research and thereby give impetus to challenging ideas and to the challenging of ideas in the social sciences and in the humanities.

Chinese Foreign Relations Robert G. Sutter, 2016-01-14 This comprehensive introduction to Chinese foreign relations assesses the accomplishments and limits China faces as it exerts increasing international influence. This balanced and thorough assessment shows China's leaders exerting more influence in world affairs but remaining far from dominant even in key areas along China's border.

Green Growth That Works Lisa Ann Mandle, Zhiyun Ouyang, James Edwin Salzman, Gretchen Cara Daily, 2019-09-12 Rapid economic development has been a boon to human well-being. It has lifted millions out of poverty, raised standards of living and increased life expectancies. But economic development comes at a significant cost to natural capital: the fertile soils, forests, coastal marshes, farmland that support all life on earth, including our own. The dilemma of our times is to figure out how to improve the human condition without destroying nature's. If ecosystems collapse, so eventually will human civilization. One answer is inclusive green growth: the efficient use of natural resources. Inclusive green growth minimizes pollution and strengthens communities against natural disasters while reducing poverty through improved access to health, education and services. Its genius lies in working with nature rather than against it. *Green Growth That Works* is the first practical guide to bring together pragmatic finance and policy tools that can make investment in natural capital both attractive and commonplace. The authors present six mechanisms that demonstrate a range of approaches used around the globe to conserve and restore earth's myriad ecosystems, including Government subsidies, Regulatory driven mitigation, Voluntary conservation, Water funds, Market based transactions, Bilateral and multilateral

payments Through a series of real world case studies the book addresses questions such as How can we channel economic incentives to make conservation and restoration desirable What approaches have worked best How can governments businesses NGOs and individuals work together successfully Pioneered by leading scholars from the Natural Capital Project this valuable compendium of proven techniques can guide agencies and organizations eager to make green growth work anywhere in the world *Daily Graphic* Kingsley Inkoom,2014-09-05 **Battlefield Tourism** David William

Lloyd,2014-07-31 In the aftermath of the Great War a wave of tourists and pilgrims visited the battlefields cemeteries and memorials of the war The cultural history of this battlefield tourism is chronicled in this absorbing and original book which shows how the phenomenon served to construct memory in Britain as well as in Australia and Canada The author demonstrates that high and low culture tradition and modernism the sacred and the profane were often inter related rather than polar opposites The various responses to the actual and imagined landscapes of battlefields are discussed as well as bereavement and how this was shaped by gender religion and the military experience Individual memory and experience combined with nationalism and imperial identity as powerful forces informing the pilgrim experience But this book not only analyzes travel to battlefields which unsurprisingly paralleled the growth of the modern tourist industry it also looks closely at the transformation of national war memorials into pilgrimage sites and shows how responses both to battlefields and memorials which continue to serve as potent symbols evolved in the years after the Great War **Congressional Record**
