Data and Decision Sciences in Action Ruhul Sarker, Hussein A. Abbass, Simon Dunstall, Philip Kilby, Richard Davis, Leon Young, 2017-07-26 Offering a concise and multidisciplinary reference guide to the state of the art in Australian operations research this book will be of great value to academics working in many disciplines associated with operations research as well as industrial practitioners engaged in planning scheduling and logistics Over 60 papers with topics ranging from academic research techniques and case studies to industrial and administrative best practices in operations research address aspects such as optimization combinatorial optimization decision analysis supply chain management queuing and routing and project management and logistics government cyber security health care systems mining and material processing ergonomics and human factors space applications telecommunications and transportation among many others This book presents the Proceedings of the National Conference of the Australian Society for Operations Research the premier professional organization for Australian academics and practitioners working in optimization and other disciplines related to operations research The conference was held in Canberra in November 2016 PV Charging and Storage for Electric Vehicles Pavol Bauer, Gautham Ram Chandra Mouli, 2021-09-02 Electric vehicles are only green as long as the source of electricity is green as well At the same time renewable power production suffers from diurnal and seasonal variations creating the need for energy storage technology Moreover overloading and voltage problems are expected in the distributed network due to the high penetration of distributed generation and increased power demand from the charging of electric vehicles The energy and mobility transition hence calls for novel technological innovations in the field of sustainable electric mobility powered from renewable energy This Special Issue focuses on recent advances in technology for PV charging and storage for electric vehicles The Handbook of Lithium-Ion Battery Pack Design John T. Warner, 2024-05-14 The Handbook of Lithium Ion Battery Pack Design Chemistry Components Types and Terminology Second Edition provides a clear and concise explanation of EV and Li ion batteries for readers that are new to the field The second edition expands and updates all topics covered in the original book adding more details to all existing chapters and including major updates to align with all of the rapid changes the industry has experienced over the past few years This handbook offers a layman s explanation of the history of vehicle electrification and battery technology describing the various terminology and acronyms and explaining how to do simple calculations that can be used in determining basic battery sizing capacity voltage and energy By the end of this book the reader will have a solid understanding of the terminology around Li ion batteries and be able to undertake simple battery calculations. The book is immensely useful to beginning and experienced engineers alike who are moving into the battery field Li ion batteries are one of the most unique systems in automobiles today in that they combine multiple engineering disciplines yet most engineering programs focus on only a single engineering field This book provides the reader with a reference to the history terminology and design criteria needed to understand the Li ion battery

and to successfully lay out a new battery concept Whether you are an electrical engineer a mechanical engineer or a chemist this book will help you better appreciate the inter relationships between the various battery engineering fields that are required to understand the battery as an Energy Storage System It gives great insights for readers ranging from engineers to sales marketing management leadership investors and government officials Adds a brief history of battery technology and its evolution to current technologies Expands and updates the chemistry to include the latest types Discusses thermal runaway and cascading failure mitigation technologies Expands and updates the descriptions of the battery module and pack components and systems Adds description of the manufacturing processes for cells modules and packs Introduces and discusses new topics such as battery as a service cell to pack and cell to chassis designs and wireless BMS

Communicating Mobility and Technology Ehren Helmut Pflugfelder, 2016-07-07 Winner of the 2018 CCCC Technical and Scientific Communication Award in the category of Best Book in Technical or Scientific Communication Responding to the effects of human mobility and crises such as depleting oil supplies Ehren Helmut Pflugfelder turns specifically to automobility a term used to describe the kinds of mobility afforded by autonomous automobile based movement technologies and their ramifications. Thus far few studies in technical communication have explored the development of mobility technologies the immense power that highly structured environmentally significant systems have in the world or the human machine interactions that take place in such activities Applying kinaesthetic rhetoric a rhetoric that is sensitive to and developed from the mobile material context of these technologies Pflugfelder looks at transportation projects such as electric taxi cabs from the turn of the century to modern day open source vehicle projects and a large case study of an autonomous electric pod car network that ultimately failed Kinaesthetic rhetoric illuminates how mobility technologies have always been persuasive wherever and whenever linguistic symbol systems and material interactions enroll us often unconsciously into regimes of movement and ways of experiencing the world As Pflugfelder shows mobility technologies involve networks of sustained arguments that are as durable as the bonds between the actors in their networks **Behaviour of Lithium-Ion Batteries** in Electric Vehicles Gianfranco Pistoia, Boryann Liaw, 2018-02-10 This book surveys state of the art research on and developments in lithium ion batteries for hybrid and electric vehicles It summarizes their features in terms of performance cost service life management charging facilities and safety Vehicle electrification is now commonly accepted as a means of reducing fossil fuels consumption and air pollution At present every electric vehicle on the road is powered by a lithium ion battery Currently batteries based on lithium ion technology are ranked first in terms of performance reliability and safety Though other systems e g metal air lithium sulphur solid state and aluminium ion are now being investigated the lithium ion system is likely to dominate for at least the next decade which is why several manufacturers e g Toyota Nissan and Tesla are chiefly focusing on this technology Providing comprehensive information on lithium ion batteries the book includes contributions by the world's leading experts on Li ion batteries and vehicles **Advances in Human Aspects of**

Transportation Neville A. Stanton, Steven Landry, Giuseppe Di Bucchianico, Andrea Vallicelli, 2016-07-26 This book discusses the latest advances in research and development design operation and analysis of transportation systems and their complementary infrastructures It reports on both theories and case studies on road and rail aviation and maritime transportation The book covers a wealth of topics from accident analysis vehicle intelligent control and human error and safety issues to next generation transportation systems model based design methods simulation and training techniques and many more A special emphasis is given to smart technologies and automation in transport as well as to user centered ergonomic and sustainable design of transport systems The book which is based on the AHFE 2016 International Conference on Human Factors in Transportation held on July 27 31 2016 in Walt Disney World Florida USA mainly addresses transportation system designers industrial designers human computer interaction researchers civil and control engineers as well as vehicle system engineers Moreover it represents a timely source of information for transportation policy makers and social scientists dealing with traffic safety management and sustainability issues in transport The Global Rise of the **Modern Plug-In Electric Vehicle** John D.
