Mathematical Modelling: From Theory To Practice Ngan Hoe Lee,Kit Ee Dawn Ng,2015-01-19 This book documents the journey undertaken by educators from the Mathematics and Mathematics Education MME Academic Group in the National Institute of Education NIE and Singapore schools during a Mathematical Modelling Outreach MMO event in June 2010 under the guidance of renowned experts in the field of mathematical modelling The main goal of MMO was to reach out to Singapore primary and secondary schools and introduce the potentials of mathematical modelling as a platform for eliciting mathematical thinking communication and reasoning among students This book contributes to the expanding literature on mathematical modelling by offering voices from the Singaporean context It suggests how theoretical perspectives on mathematical modelling can be transformed into actual practice in schools all within the existing infrastructure of the current Singapore mathematics curriculum More importantly the book provides documentary evidence on how plans put in place through MMO in 2010 have since been realised The publication of this book is hence timely at this juncture Not only does the book record how MMO was among the first pebbles launched into the pond it also serves as a bridge over which educators can stand upon to view how the ripple effect had developed from the initial MMO pebble and the directions it may continue to extend Perhaps in the process other ripples in the teaching learning and research of mathematical modelling can be created

Rigor and Structure John P. Burgess,2015 While we are commonly told that the distinctive method of mathematics is rigorous proof and that the special topic of mathematics is abstract structure there has been no agreement among mathematicians logicians or philosophers as to just what either of these

assertions means John P Burgess clarifies the nature of mathematical rigor and of mathematical structure and above all of the relation between the two taking into account some of the latest developments in mathematics including the rise of experimental mathematics on the one hand and computerized formal proofs on the other hand The main theses of Rigor and Structure are that the features of mathematical practice that a large group of philosophers of mathematics the structuralists have attributed to the peculiar nature of mathematical objects are better explained in a different way as artefacts of the manner in which the ancient ideal of rigor is realized in modern mathematics Notably the mathematician must be very careful in deriving new results from the previous literature but may remain largely indifferent to just how the results in the previous literature were obtained from first principles Indeed the working mathematician may remain largely indifferent to just what the first principles are supposed to be and whether they are set theoretic or category theoretic or something else Along the way to these conclusions a great many historical developments in mathematics philosophy and logic are surveyed Yet very little in the way of background knowledge on the part of the reader is presupposed

The Athenaeum, 1863 **Executive Function and Education** Mariët Huizinga, Dieter Baeyens, Jacob A. Burack, 2018-09-21 Executive function is an umbrella term for various cognitive processes that are central to goal directed behavior thoughts and emotions These processes are especially important in novel or demanding situations which require a rapid and flexible adjustment of behavior to the changing demands of the environment The development of executive function relies on the maturation of associated brain regions as well as on stimulation in the child s social contexts especially the home and school Over the past decade the term executive function has become a buzzword in the field of education as both researchers and educators underscore the importance of skills like goal setting planning and organizing in academic success Accordingly in initiating this Research Topic and eBook our goal was to provide

a forum for state of the art theoretical and empirical work on this that both facilitates communication among researchers from diverse fields and provides a theoretically sound source of information for educators The contributors to this volume who hail from several different countries in Europe and North America have certainly accomplished this goal in their nuanced and cutting edge depictions of the complex links among various executive function components and educational success
