

Algebra 2 Honors Roller Coaster Project

OBJECTIVE: You will create a roller coaster that demonstrates your knowledge and understanding of the following:

- **Part A:** Graph a continuous piecewise function that represents a roller coaster using, at a minimum, Linear, Absolute Value, Quadratic, and Cubic functions for individual sections of the roller coaster.
- **Part B:** Write the equation for each section of the roller coaster. Use slope-intercept form for lines and transformation form for absolute value, quadratic, and cubic functions.
- **Part C:** Write a single piecewise equation, with correct domain restrictions, to represent the entire roller coaster.
- **Part D:** Identify and analyze function attributes and key features such as:
 - Domain and Range
 - Local Minima and Maxima
 - Intervals of Increase, Decrease, and Constant
 - Average Rate of Change
- Use the attached rubric to guide your work. If you want 100, be sure to accurately complete all of the requirements! This is worth as much as a test grade... *do not wait until the last minute to complete this!*

DUE: Monday, Nov 16th for 1,3,5; Tuesday, Nov 17th for 2,6. **10 points will be taken off for each day it is late.**

Part A: The Graphs

Rough Draft: On the graph provided, you will create a sketch of your roller coaster with the following guidelines:

- The name of your roller coaster as the title of the graph.
- Let the x -axis represent time (t) in seconds and the y -axis represent height (h) in feet
- Include the following functions: one horizontal line, one positive line, one negative line, one absolute value function, two quadratic functions, and two cubic functions.
- Use different colors to indicate the functions on the graph.
- You may use additional curves, lines, etc. that are not included in the analysis to complete your roller coaster
- Must be approved by your teacher no later than **November 11th**

Final Draft: Use your rough draft to create your final roller coaster using one of the following options:

- **Option 1:** Neatly draw your roller coaster on a second graph attached to poster board or construction paper.
 - Use a ruler and draw all functions with precision using the same scale as the rough draft.
 - Color code the portions of the graph that correspond with the equations from Part B.
 - Other details and background are allowed in order to bring your coaster to life.
- **Option 2:** Use Desmos to create the graph of your roller coaster. See instructions for using Desmos below. If you choose this option **you are still required to show work** in the Equation column on Part B that supports your values for a , h , and k for the non-linear functions, and m and b for the linear functions.
 - Use the same scale as the rough draft.
 - Color code the portions of the graph that correspond with the equations from Part B.

Desmos Instructions:

To restrict the domain of your element: In the equation editor, after the equation, type [to begin the restriction, then enter the restriction as an inequality, then type] to close the restriction.

To change the color of your element: Use the gear setting in the top right corner of the equation editor. Then, click on the colored circle on the left to select a different color. Click "Done" to set your selections.

You may repeat colors as long as they are for different elements (one line and one quadratic may both be blue, but not two lines). Use black for any elements you are not planning to analyze.
