2. **Measure:** Click **Restart** (RE). Use **Advance frame** (RF) to advance the recording one second. Mark the animal's position with an arrow (→) and repeat. Estimate the distance the animal traveled in one second. (Note: The trees in the background are 5 meters apart.)

3. **Calculate:** The distance an animal travels each second is its speed. What is the estimated speed of this animal? \_\_\_\_\_ meter per second \_\_\_\_\_ (Units are meters per second, or m/s.)

4. **Measure:** You can get a more accurate estimate of distance and time using these steps:
  - Use the **Time slider** to position the animal so that its nose is even with the first tree. Record the current time in the table below as **Time 1**.
  - Position the animal so that its nose is even with the last tree and record **Time 2**.
  - Subtract the first time from the second to get the **Time difference**.
  - Record the **Distance** from the first tree to the last. (The trees are 5 meters apart.)

## **Bohmian Mechanics, Open Quantum Systems and**

**Continuous Measurements** Antonio B. Nassar,Salvador Miret-Artés,2017-03-14 This book shows how Bohmian mechanics overcomes the need for a measurement postulate involving wave function collapse The measuring process plays a very important role in quantum mechanics It has been widely analyzed within the Copenhagen approach through the Born and von Neumann postulates with later extension due to L ders In contrast much less effort has been invested in the measurement theory within the Bohmian mechanics framework The continuous measurement sharp and fuzzy or strong and weak problem is considered here in this framework The authors begin by generalizing the so called Mensky approach which is based on restricted path integral through quantum corridors The measuring system is then considered to be an open quantum system following a stochastic Schr dinger equation Quantum stochastic trajectories in the Bohmian sense and their role in basic quantum processes are discussed in detail The decoherence process is thereby described in terms of classical trajectories issuing from the violation of the noncrossing rule of quantum trajectories
