Overlapping Territories Bambang Sugiharto,Roy Voragen,2011-05-25 The post Cold War situation has given way to a new and unprecedented constellation of global interrelations The power constellation today is not only multi polar but rather chaotic its configuration keeps shifting and it is determined not simply by new emerging super powers but also by any seemingly small events in non linear modes of interaction The interdependency between communities somehow makes significant changes unpredictable Such an interdependent yet chaotic world order in turn raises new philosophical questions Identity culture and civilization cannot be understood anymore simply in terms of traditional categories These categories are called into question through mutual interrogation and mutual enlargement of horizons and this inevitably entails hybridization and pluralization The Asian voices included in this book speak of recognition of and respect for the otherness the other outside as well as inside The writers mostly see globalization as well as their own cultural positions through dialogical imagination in which a Western philosophical framework is deployed to find out their Asian positions and the reverse the Asian reality is used to problematize the Western framework Thereby this book attempts to shed light on the question of how we are to understand culture and civilization

The Intellectual Commons Henry C. Mitchell,2005-01-01 The rapid emergence of digital media has

created both new economic opportunities and new risks for authors publishers and users in regards to intellectual property There is a theoretical conflict raging between those who believe information should be free and those attempting to protect intellectual property through surveillance and control of access The Intellectual Commons works to develop a theory of intellectual property that is based on a theory of natural rights that assumes the existence of a natural world of intellectual resources Chett Mitchell develops a moral framework that makes cooperation among the groups involved rather than conflict central to understanding intellectual property rights Drawing on early modern theorists such as Grotius Pufendorf and Locke as well as the intellectual theory of copyright put forth by L Ray Patterson Mark Rose and Michel Foucault Intellectual Commons presents a way to bring IP theory and practice together This book is an important addition to the intellectual property debate and a must for law students communication theorists and any person interested in the future of digital media rights

Animal Encounters Susan Crane,2012-11-29 Traces of the living animal run across the entire corpus of medieval writing and reveal how pervasively animals mattered in medieval thought and practice In fascinating scenes of cross species encounters a raven offers St Cuthbert a lump of lard that waterproofs his visitors boots for a whole year a scholar finds inspiration for his studies in his cat s perfect focus on killing mice and a dispossessed knight wins back his heritage only to give it up again in order to save the life of his warhorse Readers have often taken such encounters to be merely figurative or fanciful but Susan Crane discovers that these scenes of interaction are firmly grounded in the intimate cohabitation with animals that characterized every medieval milieu from palace to village The animal encounters of medieval literature reveal their full meaning only when we recover the living animal s place within the written animal The grip of a certain humanism was strong in medieval Britain as it is today the humanism that conceives animals in diametrical opposition to humankind Yet medieval writing was far from univocal in this regard Latin and vernacular works abound in other ways of thinking about animals that invite the saint the scholar and the knight to explore how bodies and minds interpenetrate across species lines Crane brings these other ways of thinking to light in her readings of the beast fable the hunting treatise the saint s life the bestiary and other genres Her substantial contribution to the field of animal studies investigates how animals and people interact in culture making how conceiving the animal is integral to conceiving the human and how cross species encounters transform both their animal and their human participants

approach goes further than biocentrism ecocentrism and holism to ground an inclusive African holistic moral egalitarianism suggesting that all forces and all created things have life We are not emphasizing how every system and creature command equal respect rather everything has life commands respect and moral concern as a minimum imperative within a Black African holistic approach to bioethics However holistic bioethics can neither be Western nor an African invention that people of other cultures only admire from a distance Moreover holistic bioethics doesn't offer the last word on the ethics of nonhuman animals holistic anamnestic solidarity the relational Other and intercultural theological bioethics *Catalog Food and Nutrition Information Center (U.S.),1974* How Do We Achieve and Maintain Variety and Optimum Numbers of Wildlife? ,1974 *The Environmental Imperative* Max Oelschlaeger,1977 **Iceborn** Gregory Benford,Paul A Carter,2014-09-30 Pluto was the last place anyone expected to find life That's why it's the last place they looked
