The course is designed to maximise the performance of school age learners. It features eight units covering the core topics: vocabulary, grammar and skills needed for all four exam papers for the revised Cambridge English First FCE for Schools exam from 2015. Two teen-inspired topics in each unit ensure the entire exam syllabus is covered and can also act as a basis for CLIL-based extension activities and projects. Grammar sections and a Grammar Reference help students build up the accurate language structure necessary for the Use of English parts of the new Reading and Use of English paper while B2 level vocabulary is targeted drawing on insights from English Profile and brought together in a Wordlist based on key vocabulary from the units. Exam tips and grammar and vocabulary exercises teach students to avoid common mistakes identified in Cambridge's unique collection of real exam papers: the Cambridge Learner Corpus. Discovering Higher Mathematics Alan Levine, Alan L. Levine, 1999-10-29 Funded by a National Science Foundation grant, Discovering Higher Mathematics emphasizes four main themes that are essential components of higher mathematics: experimentation, conjecture, proof and generalization. The text is intended for use in bridge or transition courses designed to prepare students for the abstraction of higher mathematics. Students in these courses have normally completed the calculus sequence and are planning to take advanced mathematics courses such as algebra, analysis and topology. The transition course is taken to prepare students for these courses by introducing them to the processes of conjecture and proof concepts which are typically not emphasized in calculus but are critical components of advanced courses. Constructed around four key themes: Experimentation, Conjecture, Proof and Generalization. Guidelines for effective mathematical thinking covering a variety of interrelated topics. Numerous problems and exercises designed to reinforce the key themes.
