The Medium and Daybreak, 1876 **Science**, 1893 Vols for 1911-13 contain the Proceedings of the Helminthological Society of Washington ISSN 0018-0120 1st-15th meeting English Mechanic and World of Science, 1870 *A Mathematical Solution Book Containing Systematic Solutions to Many of the Most Difficult Problems* Benjamin Franklin Finkel, 1888 *On Cassette*, 1990 **Mind, Brain and the Elusive Soul** Dr Mark Graves, 2013-05-28 Does science argue against the existence of the human soul? Many scientists and scholars believe the whole is more than the sum of the parts. This book uses information and systems theory to describe the more that does not reduce to the parts. One sees this in the synapses or apparently empty gaps between the neurons in one's brain where informative relationships give rise to human mind, culture and spirituality. Drawing upon the disciplines of cognitive science, computer science, neuroscience, general systems theory, pragmatic philosophy and Christian theology, Mark Graves reinterprets the traditional doctrine of the soul as form of the body to frame contemporary scientific study of the human soul. All Creation Groans Daniel W. O'Neill, Beth Snodderly, 2021-05-18 In a suffering world reeling from global pandemics and health disparities, it is high time to think theologically about the devastating experience of disease and to address our God-inspired responsibility to understand its origins and engage in its management. In a fragmented world, we need a unifying and integrated perspective on people in communities embedded in a fractured ecology. In an academic world blind to the spiritual world and imbalanced toward technical solutions, the global church must articulate a contemporary metanarrative that is moral, practical and deeply transformational. All Creation Groans brings together multiple perspectives for a compelling global health approach to the pathologies of the world as a part of the *missio Dei*. The authors paint a unifying perspective on God's healing intentions in creation, redemption and consummation and the opposing nature corrupting effects of the rebellion of created moral agents. It is a fresh call for the global church to engage in aligning with God's healing action for eternally sustainable global health.

The Physics of the Mind Phil Mollon, 2025-10-09 *The Physics of the Mind: New Perspectives for Psychotherapists, Healers and Seekers* is aimed at psychotherapists, psychoanalysts, healers and anyone interested in the interface of physics and the mind. Both are interesting topics, even more so when combined. Phil Mollon's expertise is within psychology and over his long career he came to realise the importance of physics to the field. In particular, the branches that place mind and consciousness in the foreground of how we might understand the universe and our place within it. There is a deep organising principle operating at all levels of the universe. It gives rise to life and is apparent within the human mind in dreams and creativity. A key lesson from quantum physics is that consciousness and the human mind are inextricably involved in the emergence of what we can observe and experience of our matter-based realm. In other words, the behaviour of the quantum realm is shaped by our observation of it. Just as we think of space-time as shaped by gravitational forces and massive bodies, so we can conceptualise mind-space. The latter contains mathematical correlations of thought, emotion and memory whereby

what is similar attracts more of the same in a manner analogous to gravity These have effects within the mind and in the wider life field For example severe and repeated childhood trauma creates the equivalent of black holes in the mind space Metaphysics posits that our matter based universe is subtended within an infinite unified field of intelligence and creativity We are contained within a vast mind The principle is that unlimited guidance and knowledge is available via meditation and intuition requiring only that we seek It is never thrust upon us This is a book filled with extraordinary ideas to dip into wherever curiosity and intuition lead It is the author s fervent wish that what is within will stimulate thought and awareness and spark continuing creative concepts concerning our place in this cosmos

Science to Solutions Richard Clapp,2017-03-02 First Published in 2017 In this volume the editor collected articles that primarily appeared in the Scientific Solutions section of New Solutions A Journal of Environmental and Occupational Health Policy The articles in the book are grouped into three general categories starting with Critical Science These articles are primarily critiques of how science is done or how science is incorporated into public health policy in the United States and elsewhere The second category is what I have called Precautionary Science These articles such as the ones by Dement on asbestos and Solomon and colleagues on the risks of manganese essentially call for precautionary regulations to reduce exposures where there is substantial but in the eyes of some less than definitive scientific knowledge The final category is Solutions Science In some ways this represents the current stage of precautionary science where we have begun to look at larger societal issues and have moved beyond traditional scientific approaches and critiques
