Terence J. O'Neil, Terry O'Neil, 2015 Luigi Chinetti's association with Ferrari and the origins formation and racing history of NART North American Racing Team A complex organisation inextricably linked to Luigi Chinetti Motors Inc NART enjoyed success on the race tracks of the US and Europe for three decades as well as financial difficulties and arguments with organisers to rightly become a legend **The Industrialization of São Paulo, 1800-1945** Warren Dean, 2014-11-06 São Paulo is one of the few places in the underdeveloped world where an advanced industrial system has grown out of a tropical raw material exporting economy By 1960 there were 830 000 industrial workers in the state producing 3.3 billion worth of goods It had become Latin America's largest industrial center This is a study of the early years of manufacturing in São Paulo how it was influenced by the growth and decline of the coffee trade where it found its markets its credit and its labor force and how it confronted the competition of imports The principal focus however is on the manufacturers themselves whose perceptions of their opportunities determined how industrialization was brought about Warren Dean discusses their social origins their connections with other sectors of the elite their attitudes toward workers and consumers and their view of the potentialities of economic development He analyzes the political activities of the manufacturers to discover both how they promoted their interests and how they confronted the larger challenge of social and political transformation Paradoxically the industrialization of São Paulo is not a success story of private entrepreneurship Until after World War II manufacturing grew quite slowly and its hallmarks were always low productivity technical backwardness and consumer hostility More than half of the state's present large scale factory production and nearly all of its heavy industry was built by foreign capital or state enterprise not by

privately owned firms Dean shows that this outcome is partly a consequence of the historical experience of domestic manufacture Throughout the book the author points out the peculiar articulations of the industrial system of S o Paulo the significant social and political interests that determined what kinds of development were possible The result is an exposition of an unusual case study in twentieth century economic development
