Mitchell, Cynthia Davis, 2011-10-18 Harlem Renaissance writer Dorothy West led a charmed life in many respects Born into a distinguished Boston family she

appeared in Gershwin's *Porgy and Bess* then lived in the Soviet Union with a group that included Langston Hughes to whom she proposed marriage. She later became friends with Jacqueline Kennedy Onassis who encouraged her to finish her second novel *The Wedding* which became the octogenarian author's first bestseller. *Literary Sisters* reveals a different side of West's personal and professional lives, her struggles for recognition outside of the traditional literary establishment and her collaborations with talented African American women writers, artists and performers who faced these same problems. West and her literary sisters, women like Zora Neale Hurston and West's cousin poet Helene Johnson, created an emotional support network that also aided in promoting publishing and performing their respective works. Integrating rare photos, letters and archival materials from West's life, *Literary Sisters* is not only a groundbreaking biography of an increasingly important author but also a vivid portrait of a pivotal moment for African American women in the arts. *Sessional Papers - Legislature of the Province of Ontario*. Global Threats, Global Futures Thayer Scudder, 2010-01-01. A work of political economy from the perspective of an anthropologist who has made a career of studying poverty and displaced people, *Global Threats, Global Futures* will prove rewarding reading for anyone concerned with issues of economic development, environmental and cultural degradation and the causes and solutions of poverty. Most of all, Thayer Scudder illuminates a path not only possible but plausible through a destructive maze of humankind's own making if only the political will can be found to tread it. *Engineering Science*. Thayer Scudder is one of those gifted authors who have the experience and the vision to span multiple sectors and far-flung sites in assessing where humankind and its habitat are heading. His restless curiosity in everything around him has led him to become not simply the world's leading authority on the impacts on the lives of people resettled by dam building projects but an innovative thinker about development, anthropology and the threats to the globe from poverty, fundamentalism in all its pernicious forms and environmental degradation. This iconoclastic book assails sacred cows ranging from the World Bank to the malign role of Buddhist priests in the late civil war in Sri Lanka. The work is not reassuring. But its conclusion that humans can learn to live with declining living standards is more uplifting than doom-laden. David McDowell, Former Director General of the IUCN and New Zealand Ambassador to the United Nations. Neither Pollyanna nor Prophet of Doom. Professor Scudder has drawn on his 55 years of international experience and presented a clear, hard-hitting, extraordinarily well-documented analysis of the critical and urgent global challenges that face humankind and of the transformations that will be required to meet those challenges. This is a very important book. It should be read by an informed public but most particularly by leaders and policy makers of the world's governments, international organizations, educational and religious institutions. Lee Talbot, George Mason University, US. This is an extraordinary, bold and exceptionally well-thought-out prospectus on the next century of the human condition. Declining living standards, consequential to the pervasive pursuit of growth in terms of Gross Domestic Product, is a central theme that is thoroughly documented and engagingly articulated. The decisive role in the

decline of living standards played by global threats including poverty fundamentalism environmental degradation wars and excess consumption is compellingly presented from the perspective of the author's unique career Burton Singer Princeton University US This impressive study of the progressive impoverishment of the world's resources speaks with the authority of Thayer Scudder's fifty years of experience with international programs for technological development especially those that involve river basin development and resulting population displacement and resettlement Case studies from different continents provide the evidence for the likelihood that the majority in future generations will lead more meager lives than their twentieth century ancestors He points to what has gone wrong in our approach to the world and its resources and to the measures necessary to offset the damage already caused If only citizens have the political will to adopt them Elizabeth Colson University of California Berkeley US This is an important book It has to be listened to and for two reasons The first is the expertise of the author the guy has been there this is an anthropologist who is constantly in the field And he possesses a wide range of skills part ethnographer part biologist as much a humanist as a scientist The combination of experience and expertise is as powerful as it is unusual Sadly a second force in favor of this book is the temper of the times The giddiness of the last century has been driven underground by the perils of this Ro
