

Part II: Answer all questions in this part. Each correct answer will receive 2 credits. Clearly indicate the necessary steps, including appropriate formula substitutions, diagrams, graphs, charts, etc. For all questions in this part, a numerical answer with no work shown will receive only 1 credit.

12. The results of a poll of 200 students are shown in the table below:

	Preferred Music Style		
	Rockers	Pop	Country
Female	14	25	27
Male	24	40	28

For this group of students, do these data suggest that gender and preferred music style are independent of each other? Justify your answer.

$$P(F \text{ and } T) = .27 \neq P(F) \cdot P(T) = .24$$

$$P(F|T) = .6 \neq P(F) = .53$$

$$\frac{27}{200} \neq \frac{14}{200} \cdot \frac{24}{200}$$

$$\frac{54}{90} \neq \frac{140}{200}$$

No
(use any combo)

13. The accompanying Venn diagram shows the results of a survey asking 100 people if they get their news by reading newspaper or by the internet.

$$\begin{array}{r} 100 \\ - 80 \\ \hline 20 \text{ neither} \end{array}$$

What is the probability that a person selected at random from this survey does not claim the internet as a source of getting the news? Show how you arrived at your answer.

15 newspaper only
20 neither

65% internet
So, 35% no int

$$\frac{35}{100} = .35 = 35\%$$

Surveys on Solution Methods for Inverse Problems David Colton, Heinz W. Engl, Alfred K. Louis, Joyce McLaughlin, William Rundell, 2012-12-06 Inverse problems are concerned with determining causes for observed or desired effects Problems of this type appear in many application fields both in science and in engineering The mathematical modelling of inverse problems usually leads to ill posed problems i e problems where solutions need not exist need not be unique or may depend discontinuously on the data For this reason numerical methods for solving inverse problems are especially difficult special methods have to be developed which are known under the term regularization methods This volume contains twelve survey papers about solution methods for inverse and ill posed problems and about their application to specific types of inverse problems e g in scattering theory in tomography and medical applications in geophysics and in image processing The papers have been written by leading experts in the field and provide an up to date account of solution methods for inverse problems
