- What pattern do you observe in the data and graph of the linear function? (The data points are in a straight line, and the graph is a straight line. The slope is constant, and the y-intercept is constant.)

Characteristics of Linear Functions

Characteristics of linear functions (slope, intercept, and domain) have been addressed in previous math courses.

Characteristics of Linear Functions:

Slope:

$m = \frac{y_2 - y_1}{x_2 - x_1}$ (Slope is constant and is a positive value.)

Intercept(s):

$y = mx + b$ (Intercept is constant.)

Domain(s):

$x \in \mathbb{R}$ (Domain is all real numbers.)

Range(s):

In the linear functions, slope, intercept, and domain (x, y) and b (y-intercept) affect the graph of the linear function.

Changes caused by m

- $m = 0$: no change in slope of linear function.
- $m = 1$: no change in slope of linear function.
- $m = 2$: no change in slope of linear function.
- $m = 3$: no change in slope of linear function.
- $m = 4$: no change in slope of linear function.
- $m = 5$: no change in slope of linear function.
- $m = 6$: no change in slope of linear function.
- $m = 7$: no change in slope of linear function.
- $m = 8$: no change in slope of linear function.
- $m = 9$: no change in slope of linear function.
- $m = 10$: no change in slope of linear function.

Changes caused by b

- $b = 0$: no change in y-intercept of linear function.
- $b = 1$: no change in y-intercept of linear function.
- $b = 2$: no change in y-intercept of linear function.
- $b = 3$: no change in y-intercept of linear function.
- $b = 4$: no change in y-intercept of linear function.
- $b = 5$: no change in y-intercept of linear function.
- $b = 6$: no change in y-intercept of linear function.
- $b = 7$: no change in y-intercept of linear function.
- $b = 8$: no change in y-intercept of linear function.
- $b = 9$: no change in y-intercept of linear function.

Teaching Mathematics for the 21st Century Linda Huetinck, Sara N. Munshin, 2008 This third edition of Teaching Mathematics for the 21st Century continues to help teachers let the secret out to open up to their students the wonderful discoveries and challenges of the pattern making and problem solving aspects of a fascinating subject mathematics The rationale remains the same to enable prospective and current teachers to access and use tools and strategies to effectively teach mathematics to contemporary students Changing

demographics knowledge of how people learn and technology all impact the way we educate our young people This edition incorporates lessons and strategies from programs that have proven success in many types of classrooms Many of these examples help students connect mathematics to real life situations and communicate their understanding of the underlying concepts Although technology is constantly being upgraded ways to increase student motivation through its application remains a goal For example since applets can enhance a lesson whether the teacher uses a computer projector a smart board or has students work individually on computers we have identified several sources of mathematics applets that can be correlated to various lessons Research citations and summaries have been updated to reflect current information on teaching and learning For future teachers Teaching and Learning High School Mathematics Charlene E. Beckmann,Denisse R. Thompson,Rheta N. Rubenstein,2009-11-02 Too many high school students faced with mathematics in courses at the level of algebra and beyond find themselves struggling with abstract concepts and unwilling to pursue further study of mathematics When students curtail their course taking in mathematics they may be impacting their college and career options Thus high school mathematics teachers have the responsibility to help students recognize the value and importance of mathematics while also designing instruction that makes mathematics accessible to all students Ball and Bass 2000 as well as other mathematics educators have recognized that mathematics teachers not only need to know mathematics content and mathematics pedagogy i e teaching strategies but they also need to know how these ideas are integrated This mathematical knowledge for teaching is the knowledge that teachers of mathematics need and it differs from the knowledge that research or applied mathematicians must know This text is designed to provide teachers with insights into this mathematical knowledge for teaching Teaching and Learning High School Mathematics is likely different from many other texts that you have used It integrates both content and pedagogy to help you develop and build your own understanding of teaching The text is designed to help you develop deep conceptual understanding of fundamental mathematics Ma 1999 so that you are able to approach mathematics from multiple perspectives with many tools Such flexibility in teaching is essential if teachers are to help all students become mathematically proficient Throughout this book you are encouraged to work in cooperative teams This strategy is designed to help you develop a mathematics learning community and build a professional network that will be a valuable resource during your professional career Hopefully you will experience the benefits of engaging in rich mathematical discussions with peers and consider how to encourage such learning environments in your own classrooms Lesson planning is another element pervasive throughout this text To help teachers plan for effective student centered lessons the Question Response Support QRS Guide is introduced in Lesson 1 1 and used throughout the remainder of the lessons The QRS Guide is a tool on which teachers may record tasks or questions Q for students expected and observed student responses R and teacher support S in the form of additional just enough questions to support students in their progress on the task In each unit teachers expand their repertoire of teaching and learning elements and strategies and

incorporate these elements as they plan additional lesson segments In Unit 4 lesson planning is formally introduced as teachers put together elements from previous units into complete cohesive lesson plans **Teaching Powerful**
