and Sciences CAMLab In her detailed survey of hundreds of sites in the Ayeyarwady River basin Moore and her collaborators have revealed a long suspected but hitherto undocumented rural cultural landscape with origins well before and persisting long after the political heyday of metropolitan Bagan in the eleventh through thirteenth centuries During their investigations the authors had numerous encounters with local scholar archaeologists who identified frequently overlooked physical attributes that define the local cultural landscape In mapping these attributes the authors reconstructed a narrative of local resilience that speaks to a long local history of diversity and adaptability over an extensive region where other scholars working mainly from historical chronicles had observed only a rigid hegemony emanating from the political centre at Bagan Moore s innovative methodology breaks new ground for the study of early urban formations not only in Myanmar but throughout mainland Southeast Asia This research contributes to a building body of evidence that suggests a fresh paradigm to replace the long standing concentric circle model most often used to explain state formation throughout the region In this new paradigm the contradiction between urban and rural settlements is dismantled as the stories of the smaller villages and towns re enact the iterative process between places communities of users and social memory of Wider Bagan demonstrating in the process an ecology of resilient settlement that has endured through generations of political social and economic upheaval Richard A Engelhardt UNESCO Chair Professor of Cultural Heritage Management and Regional Advisor for Culture in Asia and the Pacific **Report** ,1972 **Inner Asia** ,2004 *BLS Report* ,1964 **Air Pollution Aspects of Emission Sources: Iron and Steel Mills** Air Pollution Technical Information Center,1972
