

The Reformation

Martin Luther, a monk from Wittenberg in Germany began to criticize the power and corruption of the Catholic church in 1517. Luther demanded reform of the church.

Some of Luther's criticisms of the church:

MARTIN LUTHER

- Indulgences - paying for forgiveness

Pardoners, with permission from the Pope, travelled all across Europe selling Indulgences. They said all you had to do was buy one and you could pay for forgiveness - even for someone who had already died. You could buy a ticket to heaven!

- The Bible - only in Latin

Luther said it was unfair of the Pope to stop translations of the bible. Ordinary people couldn't read Latin. Luther said it was unfair because they had to rely on what their priest told them - they couldn't read it themselves!

Luther's supporters became known as Protestants. This was because they protested against the Church.

At first Henry VIII disagreed with Luther. He was worried that if people were prepared to attack the church, they might be prepared to attack the monarchy. However, when the Pope refused to grant Henry's divorce from Catherine of Aragon, Henry changed his mind.

In 1534, Henry made himself head of the Church in England. Henry was now hostile to people who remained loyal to the Pope. He demanded everyone was loyal to one person - HIM - not someone far away in Rome!

In 1535, Henry began arresting monks for high treason. Some monks were publicly tortured and beheaded, and several nuns were executed. In 1536, Henry granted permission for an English translation of the bible to be published, ordering that a copy should be placed in every church in England.

The Protestant Reformation

The Reformation spread throughout Europe and began in England when Henry VIII made himself head of the Church in 1534. The struggle between Protestants and Catholics over religious beliefs would not be easily solved in England or abroad.

show how he maintains continuity between Judaism and Christianity The primary source analysis includes his 1910 and 1912 dissertations on Schelling the 1933 *The Socialist Decision* the 1952 Berlin lectures on the Jewish Question and his final public lecture on the importance of the history of religion for systematic theology Particular attention is paid to his dialectical and theological history of religion Third Tillich's positive theology of Judaism contrasts sharply with the many complex negative ways in which Judaism is portrayed in Western thought This contributes significantly to our understanding the evolving history of Christian anti Judaism

The Lever of Riches Joel Mokyr, 1992-04-09 In a world of supercomputers genetic engineering and fiber optics technological creativity is ever more the key to economic success But why are some nations more creative than others and why do some highly innovative societies such as ancient China or Britain in the industrial revolution pass into stagnation Beginning with a fascinating concise history of technological progress Mokyr sets the background for his analysis by tracing the major inventions and innovations that have transformed society since ancient Greece and Rome What emerges from this survey is often surprising the classical world for instance was largely barren of new technology the relatively backward society of medieval Europe bristled with inventions and the period between the Reformation and the Industrial Revolution was one of slow and unspectacular progress in technology despite the tumultuous developments associated with the Voyages of Discovery and the Scientific Revolution What were the causes of technological creativity Mokyr distinguishes between the relationship of inventors and their physical environment which determined their willingness to challenge nature and the social environment which determined the openness to new ideas He discusses a long list of such factors showing how they interact to help or hinder a nation's creativity and then illustrates them by a number of detailed comparative studies examining the differences between Europe and China between classical antiquity and medieval Europe and between Britain and the rest of Europe during the industrial revolution He examines such aspects as the role of the state the Chinese gave up a millennium wide lead in shipping to the Europeans for example when an Emperor banned large ocean going vessels the impact of science as well as religion politics and even nutrition He questions the importance of such commonly cited factors as the spill over benefits of war the abundance of natural resources life expectancy and labor costs Today an ever greater number of industrial economies are competing in the global market locked in a struggle that revolves around technological ingenuity *The Lever of Riches* with its keen analysis derived from a sweeping survey of creativity throughout history offers telling insights into the question of how Western economies can maintain and developing nations can unlock their creative potential
