Five-Year Study of the First Edition of the Core-Plus Mathematics Curriculum Harold Schoen, Steven W. Ziebarth, Christian R. Hirsch, Allison BrckaLorenz, 2010-07-01 The study reported in this volume adds to the growing body of evaluation studies that focus on the use of NSF funded Standards based high school mathematics curricula Most previous evaluations have studied the impact of field test versions of a curriculum Since these innovative curricula were so new at the time of many of these studies students and teachers were relative novices in their use These earlier studies were mainly one year or less in duration Students in the comparison groups were typically from schools in which some classes used a Standards based curriculum and other classes used a conventional curriculum rather than using the Standards based curriculum with all students as curriculum developers intended The volume reports one of the first studies of the efficacy of Standards based mathematics curricula with all of the following characteristics The study focused on fairly stable implementations of a first edition Standards based high school mathematics curriculum that was used by all students in each of three schools It involved students who experienced up to seven years of Standards based mathematics curricula and instruction in middle school and high school It monitored students mathematical achievement beliefs and attitudes for four years of high school and one year after graduation Prior to the study many of the teachers had one or more years of experience teaching the Standards based curriculum and or professional development focusing on how to implement the curriculum well In the study variations in levels of implementation of the curriculum are described and related to student outcomes and teacher behavior variables Item data and all unpublished testing instruments from this study are available at www.wmich.edu/cmpmp for use as a baseline of instruments and data for future curriculum evaluators or Core Plus Mathematics users who may wish to compare results of new groups of students to those in the present study on common

tests or surveys Taken together this volume the supplement at the CPMP Web site and the first edition Core Plus Mathematics curriculum materials samples of which are also available at the Web site serve as a fairly complete description of the nature and impact of an exemplar of first edition NSF funded Standards based high school mathematics curricula as it existed and was implemented with all students in three schools around the turn of the 21st century Estimation Skills, Mathematics-in-context, and Advanced Skills in Mathematics Julia H. Mitchell,1999 This report presents information from three special studies conducted as part of the National Assessment of Educational Progress NAEP 1996 mathematics assessment It is intended primarily for mathematics educators and others concerned with mathematics education such as curriculum specialists teachers and university faculty in schools of education The three studies reported here were designed to provide greater detail on how students perform on particular types of mathematics questions Studies include the Estimation Study the Study of Mathematics in Context and the Study of Students Taking Advanced Courses in Mathematics The first study was designed to explore students skills in estimation and was implemented at three grade levels It concludes that although there has been significant improvement in mathematics performance overall since 1990 at all grade levels the trend for student performance in estimation over the six years since the inception of the Estimation Study of 1990 is less clear The second study was designed to assess problem solving abilities within contexts that allow students to make connections across mathematics content areas The Advanced study was administered at grades 8 and 12 and was designed to provide students who were taking or had taken advanced courses in mathematics an opportunity to demonstrate their full mathematical proficiency Contains 71 tables and figures ASK Education Statistics Quarterly ,2001 Kaplan AP U.S. Government & Politics 2007 Edition Ulrich Kleinschmidt,Willie L.
