IS THAT APPROPRIATE? Choosing Appropriate Measures

Learning Goals

In this lesson, you will:

- ▶ Select appropriate types of measurement.
- ▶ Select appropriate units for each type of measurement.
- ▶ Determine approximate measurement for a variety of objects.
- ▶ Determine appropriate measures for area, perimeter, and volume.

In this lesson, you will use some of the facts you learned about the customary and metric systems of measurement. A measurement must include a number and a unit of measure to be recorded. One of the first decisions you must make is what unit is appropriate for your measurement. You must then decide which measurement tool you will use.

Do you remember the measurement tools you have used? Besides the simple comparisons you learned previously, what other tools are helpful to make conversions between the two measurement systems?
