Magnetism in Biology and Medicine Ferdinando Bersani, 2012-12-06 In the last few decades the research on bioelectromagnetics has expanded worldwide About one thousand researchers are now working in the field in a variety of institutions throughout the world including medical biological engineering and technical laboratories and protection agencies After many years of research a clear picture is now emerging Initially the research was mainly interested in the therapeutic applications of ELF electric and magnetic fields and the RF range was mainly taken into consideration with respect to thermal effects only Then the growing body of biological effects of ELF fields on cells and biological tissues particularly for the repair processes in bone have drawn the attention of researchers to non thermal effects ranging from static fields to microwaves A specific field of interest that has been the object of a large debate in the last twenty years has been the potential health risk associated with electric power production and distribution and more recently with domestic and industrial appliances In the last few years the explosion of the market for cellularphones has highlighted the issue of possible health dangers related to their use and to the widespread presence of base stations The first World Congress on Electricity and Magnetism in Biology and Medicine was held in Orlando Florida in 1992 and collected the widest amount of contributions from almost all the major researchers involved in the field **Dirty Electricity** Samuel Milham MD

MPH, 2012-12-06 When Thomas Edison began wiring New York City with a direct current electricity distribution system in the 1880s he gave humankind the magic of electric light heat and power in the process though he inadvertently opened a Pandoras Box of unimaginable illness and death Dirty Electricity tells the story of Dr Samuel Milham the scientist who first alerted the world about the frightening link between occupational exposure to electromagnetic fields and human disease Milham takes readers through his early years and education following the twisting path that led to his discovery that most of the twentieth century diseases of civilization including cancer cardiovascular disease diabetes and suicide are caused by electromagnetic field exposure In the second edition he explains how electrical exposure does its damage and how electricity is causing our current epidemics of asthma diabetes and obesity Dr Milham warns that because of the recent proliferation of radio frequency radiation from cell phones and towers terrestrial antennas Wi Fi and Wi max systems broadband internet over power lines and personal electronic equipment we may be facing a looming epidemic of morbidity and mortality In Dirty

Electricity he reveals the steps we must take personally and as a society to coexist with this marvelous but dangerous technology Reviews of Environmental Contamination and Toxicology George W.
