Wayne answers that important question by looking at both recent events and recent scholarship focused on the democratic electoral process including new data and timely illustrations from the 2012 elections **Politics & the Struggle for**

legitimacy of political systems have long been recognised as some of the most critical influences on regime change The book also discusses what it is about the nature of public opinion and the processes of day to day democratic participation that have made these countries vulnerable to repeated crises of legitimacy Using Indonesia Korea and Thailand as case studies this book highlights the uniqueness of the Asia s path to democracy and shows both the challenges and opportunities in getting there The book will be of interest to students and scholars of Asian Politics Comparative Politics and International Studies

Multilevel Systems at a Time of Democratic Backsliding: Global, Regional and European Union Perspectives Thomas Giegerich, 2025-09-30 This open access book takes stock of the current situation of the human right to democracy in multilevel systems of government at a time of renewed struggles with antidemocratic forces democratic backsliding It tries to answer three questions 1 Is there a human right to democracy in contemporary global and regional international law as well as European Union law and what consequences does that have for the States governmental structure top down perspective on national democracy 2 Does the human right to democracy also extend to decision making at the international and supranational level bottom up perspective on international supranational democracy 3 What is the relation between national democracy and international democracy and the corresponding human entitlements interdependence perspective The first part of an answer to these questions derives from the elements of democracy proclaimed by the United Nations as a universal value The second part results from an investigation of the national and international democratic ingredients of the right of self determination of peoples whose recognition and codification is the mainstay of the human rights revolution since 1945 The third part is added by a survey and comparison of the various democratic rights included in the global and regional human rights treaties that constitute the subjective cornerstones of democracy The fourth part is devoted to analysing the EU as exemplary but imperfect multilevel democracy In all these parts the enforcement of democratic entitlements are also discussed In the fifth part conclusions will be drawn The book is addressed to international and EU law experts as well as political scientists **Global NATO and the Catastrophic Failure in Libya** Horace Campbell, 2013-03-01 In this incisive

account scholar Horace Campbell investigates the political and economic crises of the early twenty first century through the prism of NATO's intervention in Libya. He traces the origins of the conflict, situates it in the broader context of the Arab Spring uprisings and explains the expanded role of a post Cold War NATO. This military organization, he argues, is the instrument through which the capitalist class of North America and Europe seeks to impose its political will on the rest of the world, however warped by the increasingly outmoded neoliberal form of capitalism. The intervention in Libya, characterized by bombing campaigns, military information operations, third party countries and private contractors, exemplifies this new model. Campbell points out that while political elites in the West were quick to celebrate the intervention in Libya as a success, the NATO campaign caused many civilian deaths and destroyed the nation's infrastructure. Furthermore, the instability it unleashed in the forms of militias and terrorist groups has only begun to be reckoned with as the United States learned when its embassy was attacked and personnel, including the ambassador, were killed. Campbell's lucid study is essential reading for anyone seeking to understand this complex and weighty course of events.

Taiwan's Politics In Action: Struggling To Win At The Ballot Box John F Copper, 2020-11-13

Taiwan's Politics in Action: Struggling to Win at the Ballot Box is about the most interesting and exciting aspects of Taiwan's politics: political competition in the form of electioneering campaigns and voting. The author first analyzes the theories, constructs or simply ideas about elections, especially who wins them and why. The most discussed by the pundits and the scholars are the watermelon and the pendulum theory: voting as before or not. The economic or pocketbook theory is also popular, although whether this means economic growth or greater equity has changed. Which party or candidate has the most money is also predictive. Other constructs or simply ideas are also commonplace. Divide and conquer is another approach. Another is the best campaign agenda, so too picking the most attractive candidates. Professionalism in campaigning and the use of social media are also favorite ideas. So is the appeal to voters' ethnicity, espousing liberal or conservative ideas, using protest, focusing on constant concerns such as peace and corruption, and finally the appeals of populism and progressivism. The author then examines Taiwan's two most recent elections: the 2018 mid-term or collection of local elections and the 2020 national presidential and legislative election, to apply the theories. The Nationalist Party or Kuomintang (KMT) won the former, the Democratic Progressive Party (DPP) won the latter, giving the observer a choice of evidence about how to win. The author concludes that Taiwan's democracy is being challenged but is still popular in spite of strong external forces and other worries.
