Methodology The methodology used varies from researcher to researcher but are suitable for the studies conducted Thus on the one hand studies that were subjective in nature used the interpretive paradigm where the qualitative approach adopted made use of the interview method to collect data On the other hand studies that were objectively inclined adopted the positivist philosophy and used survey questionnaires to collect data However there were some academic papers which used mixed methodology because of the nature of the study Whatever methodology used adhered to the ethos of the philosophies underpinning the methodology Contribution made to scholarship The articles come from individual researchers and each article in the proceedings is unique Mostly there is no general argument leading from one contribution to the next However it is interesting to note that in the area of economic performance it was evident that real exchange rate and net foreign direct investment contribute more towards innovations in economic growth With regard to human capital development papers presented evidence that there exists a definite need to explore the phenomenon of personal branding as limited scientific academic research has been done within the field of personal branding or on elements of the topic Thus the outcome argues that personal branding has an influence on leadership style which in turn impacts on organisational performance and related hygiene factors Furthermore it was demonstrated that current methods or strategies for enforcing institutionalisation of knowledge sharing within an organisation have not been successful and as such new strategies are needed to reinforce efforts to nurture and invigorate the institutionalisation of knowledge sharing within an organisation With regard to technology and big data impact on organisational performance it was evident that system performance memory consumption and CPU utilisation can be used as criteria to compare and evaluate big data technologies to improve organisational performance Most of the articles contribution reemphasised technology education and training as a means of digitising

Towards an International Code of Conduct for Private Security Providers Anne-Marie Buzatu,2015-09-19 The use of private security companies PSCs to provide security services has been on the rise since the end of the Cold War with PSCs operating in a number of contexts including armed conflict and areas where the rule of law has been compromised The use of private actors to perform services that are traditionally associated with the state is not limited to PSCs but is emblematic of a growing trend by governments to outsource functions with a view to improving efficiency and cutting budgets Privatization of public functions can however present a number of challenges to existing national and international regulatory and oversight frameworks In the private security sector these challenges were brought to international attention after high profile incidents in which PSCs injured civilians revealed difficulties in effectively holding international PSCs accountable This paper argues that crafting a multistakeholder regulatory approach in which key stakeholders work together to develop standards that are appropriately adapted for the private sector as well as to create governance and oversight mechanisms to hold these private actors to effective account helps to fill some of the governance gaps found in traditional regulatory approaches It recounts the developments leading to the International Code of Conduct for Private Security Service Providers ICOC and its governance and oversight mechanism the ICOC Association offering an example of the development of an initiative which sets new international standards and elaborates a multistakeholder framework and approach to governance for the private security sector A recent trend of state and non state clients requiring compliance with the ICOC initiative in their contracts with PSCs offers a new take on binding international regulation of private actors

Daily Graphic , The Muslim Brotherhood Beverley

Milton-Edwards,2015-12-14 The Muslim Brotherhood is the most significant and enduring Sunni Islamist organization of the contemporary era Its roots lie in the Middle East but it has grown into both a local and global movement with its well placed branches reacting effectively to take the opportunities for power and electoral competition offered by the Arab Spring

Regarded by some as a force of moderation among Islamists and by others as a façade hiding a terrorist fundamentalist threat, the potential influence of the Muslim Brotherhood on Middle Eastern politics remains ambiguous. *The Muslim Brotherhood: The Arab Spring and its Future Face* provides an essential insight into the organisation with chapters devoted to specific cases where the Brotherhood has important impacts on society, the state and politics. Key themes associated with the Brotherhood such as democracy, equality, pan-Islamism, radicalism, reform, the Palestine issue and gender are assessed to reveal an evolutionary trend within the movement since its founding in Egypt in 1928 to its manifestation as the largest Sunni Islamist movement in the Middle East in the 21st century. The book addresses the possible future of the Muslim Brotherhood, whether it can surprise sceptics and effectively accommodate democracy and secular trends, and how its ascension to power through the ballot box might influence Western policy debates on their engagement with this manifestation of political Islam. Drawing on a wide range of sources, this book presents a comprehensive study of a newly resurgent movement and is a valuable resource for students, scholars and policy makers focused on Middle Eastern Politics.
