2012 National Mathcounts Sprint Round:

Mad for Speed Elsa A. Nystrom, 2013-06-13 This book covers Joan Newton Cuneo's life and her roles from 1905 to 1915 as the premier female racer in the United States and spokeswoman for women drivers and good roads. Beginning with her family history and marriage to Andrew Cuneo, it traces her life in New York society, the birth of her children, and Joan's growing interest in automobile touring and racing and partnership with Louis Disbrow, her racing mechanic. The book covers Joan's experiences in three Glidden Tours, including her notes on the 1907 tour, her first races, and her rivals. It also looks at the growth and change of automobile culture and the battles for control of racing among the American Automobile Association, the Automobile Club of America, and the American Automobile Manufacturers Association, which ended in banishing women racers shortly after Joan's greatest racing victories at New Orleans in 1909. The book then follows Joan's attempts to continue racing, the end of her marriage, her move to the Upper Peninsula, and her remarriage and death. The book also includes a chapter on her female rivals in racing and touring.

GPS Declassified Richard D. Easton, Project Muse, 2013 GPS Declassified examines the development of GPS from its secret Cold War military roots to its emergence as a worldwide consumer industry. Drawing on previously unexplored documents, the authors examine how military rivalries influenced the creation of GPS and shaped public perceptions about its origin. Since the United States first program to launch a satellite in the late 1950s, the nation has pursued dual paths into space: one military and secret, the other scientific and public. Among the many commercial spinoffs, this approach has produced GPS, arguably, the greatest impact on our

Hits and Misses in the Baseball Draft Alan Maimon, Chuck Myron, 2014-02-12 If unpredictability is so much of what makes sports compelling, the baseball draft might be the best place to look. This book explores the intricate uncertainties of the draft and the people who face it. Since the modern draft began in 1965, major league teams have attempted with varying degrees of success to identify and develop stars of the future. Whether because of injury, poor performance, or mental and physical struggles, a large percentage of the most ballyhooed prospects never reach the game's highest level. Though teams have improved in recent years at turning top picks into major leaguers, the baseball draft is still centered on educated guesswork. This book explains why.

LatinoLand Marie Arana, 2024-02-20 A perfect representation of Latino diversity. The Washington Post LatinoLand draws from hundreds of interviews and prodigious research to give us both a vibrant portrait and the little-known history of our largest and fastest-growing minority in a work of prophecy, sympathy, and courage. Junot Diaz, Pulitzer Prize-winning author. LatinoLand is an exceptional, all-encompassing overview of Hispanic America based on personal interviews, deep research, and Marie Arana's life experience as a Latina. At present, Latinos comprise twenty percent of the US population, a number that is growing. By 2050, census reports project that one in every three Americans will claim Latino heritage. But Latinos are not a monolith. They do not

represent a single group The largest groups are Mexicans Puerto Ricans Dominicans Salvadorans and Cubans Each has a different cultural and political background Puerto Ricans for example are US citizens whereas some Mexican Americans never immigrated because the US Mexico border shifted after the US invasion of 1848 incorporating what is now the entire southwest of the United States Cubans came in two great waves those escaping communism in the early years of Castro many of whom were professionals and wealthy and those permitted to leave in the Mariel boat lift twenty years later representing some of the poorest Cubans including prisoners As LatinoLand shows Latinos were some of the earliest immigrants to what is now the US some of them arriving in the 1500s They are racially diverse a random infusion of white Black indigenous and Asian Once overwhelmingly Catholic they are becoming increasingly Protestant and Evangelical They range from domestic workers and day laborers to successful artists corporate CEOs and US senators Formerly solidly Democratic they now vote Republican in growing numbers They are as culturally varied as any immigrants from Europe or Asia Marie Arana draws on her own experience as the daughter of an American mother and Peruvian father who came to the US at age nine straddling two worlds as many Latinos do Thorough accessible and necessary Ms magazine LatinoLand unabashedly celebrates Latino resilience and character and shows us why we must understand the fastest growing minority in America

Managing Elite Sport Systems Svein S. Andersen, Barrie Houlihan, Lars Tore Ronglan, 2015-06-26 Over the last twenty years or so there has been a sharp increase in interest from national sports federations and governments in the development of effective elite sport systems particularly focused on achieving success in the summer and winter Olympic Games Many countries now have publicly funded elite sports strategies which provide specialist facilities and support staff and often provide direct financial support for athletes These developments have stimulated academic interest in describing the elite sport systems analysing the processes by which policy is established and evaluating the impact of these policies on elite athlete success Far less attention has been placed on the operation of the elite sports systems and on how the system interfaces with the athlete The

aim of this book is to refocus attention on the management and operation of systems designed to deliver elite success The book draws on the theoretical literature in implementation organisation theory leadership and complexity This provides an initial context for analysis and a stimulus for theory development around key questions such as How do coaches manage their relationship with athletes How does talent identification operate in practice Do coaches fulfil the role of gatekeeper between the athlete and other elements of the sports system e g sports science support How do managers support staff and athletes interpret the expectations placed on them The first part of the book focuses on aspects of the effectiveness of elite sports systems and the second explores aspects of systems operation focused on the interface between the athlete and the sport development system and cross cutting themes within the book include the management of talent identification and coach development This is illuminating reading for any student researcher or practitioner working in sport development sport management or sports coaching *Handbook of the London 2012 Olympic and Paralympic Games* Vassil

Global Souths Don Rodney Junio,Cecile Koopman,2020-07-13 This book constitutes the refereed proceedings of the 11th International Development Informatics Association Conference IDIA 2020 held in Macau China in March 2020 The 14 revised full papers presented were carefully reviewed and selected from 43 submissions The papers are organized in topical sections on ICT4D taking stock harnessing frontier technologies for sustainable development ICT4D discourse methodologies and theoretical reflections the evolving Global Souths The conference was held virtually due to the COVID 19 pandemic **The**

Early Laps of Stock Car Racing Betty Boles Ellison, 2014-09-17 The first organized sanctioned American stock car race took place in 1908 on a road course around Briarcliff New York staged by one of America's early speed maven's William K Vanderbilt Jr. A veteran of the early Ormond Daytona Beach speed trials Vanderbilt brought the Grand Prize races to Savannah Georgia the same year. What began as a rich man's sport eventually became the working man's sport finding a home in the South with the infusion of moonshiners and their souped up cars. Based in large part on statements of drivers, car owners and others garnered from archived newspaper articles, this history details the development of stock car racing into a megasport chronicling each season through 1974. It examines the National Association for Stock Car Automobile Racing's 1948 incorporation documents and how they differ from the agreements adopted at NASCAR's organization meeting two months earlier. The meeting's participants soon realized that their sport was actually owned by William H G. Bill France and its consequential growth turned his family into billionaires. The book traces the transition from dirt to asphalt to superspeedways, the painfully slow advance of safety measures and the shadowy economics of the sport.
