Monthly Catalogue, United States Public Documents, 1989 *Monthly Catalog of United States Government Publications*, 1991-10 Handbook of Normative Data for Neuropsychological Assessment Maura Mitrushina, Kyle B. Boone, Jill Razani, Louis F. D'Elia, 2005-02-10

When *Handbook of Normative Data for Neuropsychological Assessment* was published in 1999 it was the first book to provide neuropsychologists with summaries and critiques of normative data for neuropsychological tests. The Second Edition, which has been revised and updated throughout, presents data for 26 commonly used neuropsychological tests including Trailmaking Color Trails Stroop Color Word Interference Auditory Consonant Trigrams Paced Auditory Serial Addition Ruff 2 and 7 Digital Vigilance Boston Naming Verbal Fluency Rey Osterrieth Complex Figure Hooper Visual Fluency Design Fluency Tactual Performance Wechsler Memory Scale Revised Rey Auditory Verbal learning Hopkins Verbal learning WHO UCLA Auditory Verbal Learning Benton Visual Retention Finger Tapping Grip Strength Dynamometer Grooved Pegboard Category and Wisconsin Card Sorting tests. In addition, California Verbal learning CVLT and CVLT II CERAD List Learning and selective Reminding Tests as well as the newest version of the Wechsler Memory Scale WMS III and WMS IIIA are reviewed. Locator tables throughout the book guide the reader to the sets of normative data that are best suited to each individual case depending on the demographic characteristics of the patient and highlight the advantages associated with using data for comparative purposes. Those using the book have the option of reading the authors' critical review of the normative data for a particular test or simply turning to the appropriate data locator table for a quick reference to the relevant data tables in the Appendices. The Second Edition includes reviews of 15 new tests. The way the data are presented has been changed to make the book easier to use. Meta-analytic tables of predicted values for different ages and education where relevant are included for nine tests that have a sufficient number of homogeneous datasets. No other reference offers such an effective framework for the critical evaluation of normative data for neuropsychological tests. Like the first edition, the new edition will be welcomed by practitioners, researchers, teachers, and graduate students as a unique and valuable contribution to the practice of neuropsychology.
