Propertius: Elegies Book 4 Propertius, 2009-06-18 In this edition of Propertius Book IV Camps follows the general lines of his earlier edition of Book I Cambridge 1960 He has presented without concealing difficulties and uncertainties a fairly conservative but readable and coherent text together with such annotation as may help the modern reader of Latin to understand the language and follow the thought of this difficult much disputed but very rewarding poet While the book may be of interest to students and amateurs of Latin in general the editor has had in mind the particular needs of undergraduates and of sixth forms The notes are weighted differently from those in Butler and Barber's edition of 1933 and the text of that edition and from the Oxford text of 1960 As far as we know this is the poet's last work He has moved away from his earlier preoccupation with the theme of love and the eleven careful elegies that compose the present book are on a variety of subjects Most are concerned with Roman antiquities The last is an elaborate and celebrated epitaph on a lady of Roman nobility But perhaps the poems likely to appeal most to a modern reader are the two in which Propertius recalls and exhibits in a new light the figure of Cynthia the declared inspiration of the elegies of Book I

Constantine of Pisa: The Book of the Secrets of Alchemy Barbara

Obrist,2023-10-16 The Liber Secretorum Alchimie dating almost back to 1257 presents an attempt at introducing alchemy into the field of Aristotelian natural science philosophy with the purpose of providing the practice of manipulating metals with a solid theoretical foundation Arranged from lecture notes by its author a student of medicine originating from Pisa it allows a direct insight into mid 13th century university teaching of natural science which included astronomical astrological meteorological and geographical material In the case of the present document the main theological issues of the time are also passed in review Despite the uncertainty as to the identity of the compiler of the recipes appended to its theoretical part in the 14th century manuscript from which the text is being edited several passages of the theoretical part of the Liber Secretorum Alchimie also testify to the general interest of mid 13th century intellectuals in practical proceedings So far little clearly datable evidence has emerged on the teaching and on the dissemination of theories on the transmutation of metals in its earlier mediaeval phase the 13th century This document points out that they had been taught and commented upon in lectures on Aristotle's Meteorologica shortly after the middle of the 13th century It also testifies to the fact that observational evidence was included in discussions at university level The Liber secretorum alchimie is thus the at times rather distorted echo of a lecture on Aristotle's writings certainly not unlike the commentaries written by Albert the Great A Text-book of Church History Johann Carl Ludwig Gieseler,Johann Karl Ludwig Gieseler,1857 *The Farmers' Cabinet, and American Herd-book* ,1841 *Aeneid: book v., ed. with intr., notes [&c.], by J.F.
