Do not accelerate engine excessively immediately after starting before oil pressure can build up.

## Stopping engine

- Turn key back to OFF position. Fuel supply is cut off at this moment, engine will stop.
- Do not stop engine immediately after hard or extended driving. Keep engine running at increased idle for about two minutes to prevent excessive heat build-up before turning off engine.

**Never leave engine idling unattended. If warning lights should come on to indicate improper operation, they would go unheeded. This could result in overheating or other damage to the car.**

## Fuel: Diesel Fuel No. 2

Not all gas stations offer Diesel fuel. Stations offering Diesel fuel are generally located at truck routes along the major North American highways. Before you travel to remote, isolated areas, be sure to check in advance whether Diesel fuel is available.

Truck operators guides or directories of Diesel fuel stations are generally sold at Diesel fuel stations. One such Diesel fuel guide for North America, which we know of, is published by Diesel Fuel Services, Inc., P.O. Box 256, South Salem, New York 10590.

Some U.S. states and Canadian Provinces require that owners of diesel-powered cars obtain special permits and comply with other requirements when purchasing fuel. Ask your VW dealer or inquire at any Diesel fuel station whether such requirements exist in your area.
