

21.1 Protist Classification—The Saga Continues

Lesson Objectives

-  Explain what a “protist” is.
-  Describe how protists are related to other eukaryotes.

Lesson Summary

The First Eukaryotes Protists are eukaryotes that are not members of the plant, animal, or fungi kingdoms. The first eukaryotes were protists.

- ▶ Most protists are unicellular.
- ▶ Protists are a very diverse group of species.
- ▶ Many species of protists are more closely related to plants, fungi, or animals than they are to other protists. Because of this, some scientists think the members of the kingdom Protista should be reclassified.

Protists—Ancestors and Descendants All eukaryotes are descended from early protists, but modern protists are very different from their ancestors. Like other eukaryotes, they have been evolving over the last 2.5 billion years.

The First Eukaryotes

1. What is a protist?

2. Why are brown algae considered protists even though they are multicellular?

3. Why do scientists no longer use the categories of animal-like, plantlike, and fungus like protists to classify protists?

For Questions 4–7, complete each statement by writing the correct word or words.

4. Most single-celled eukaryotes are currently classified as _____.
5. Genetic analyses of protists indicate that they belong in six different _____.
6. Protists were the first _____.
7. Unlike most protists, which are unicellular, kelp has _____ tissues.

211 Protist Classification Worksheet Answers

Robert Harding Whittaker

211 Protist Classification Worksheet Answers:

The Software Encyclopedia ,1986 *Protist Classification and the Kingdoms of Organisms* Robert Harding
Whittaker,1978 Traditional classification imposed a division into plant like and animal like forms on the unicellular eukaryotes or protists in a current view the protists are a diverse assemblage of plant animal and fungus like groups Classification of these into phyla is difficult because of their relatively simple structure and limited geological record but study of ultrastructure and other characteristics is providing new insight on protist classification Possible classifications are discussed and a summary classification of the living world into kingdoms Monera Protista Fungi Animalia Plantae and phyla is suggested This classification also suggests groupings of phyla into superphyla and form superphyla and a broadened kingdom Protista including green algae oomycetes and slime molds but excluding red and brown algae The classification thus seeks to offer a compromise between the protist and protoctist kingdoms of Whittaker and Margulis and to combine a full listing of phyla with grouping of these for synoptic treatment

Decoding **211 Protist Classification Worksheet Answers**: Revealing the Captivating Potential of Verbal Expression

In a time characterized by interconnectedness and an insatiable thirst for knowledge, the captivating potential of verbal expression has emerged as a formidable force. Its ability to evoke sentiments, stimulate introspection, and incite profound transformations is genuinely awe-inspiring. Within the pages of "**211 Protist Classification Worksheet Answers**," a mesmerizing literary creation penned by a celebrated wordsmith, readers attempt an enlightening odyssey, unraveling the intricate significance of language and its enduring effect on our lives. In this appraisal, we shall explore the book's central themes, evaluate its distinctive writing style, and gauge its pervasive influence on the hearts and minds of its readership.
