The Interloper Michel Anteby, 2024-04-09 A stranger enters your world and starts asking questions you would prefer not to answer What do you do Mostly when an interloper appears communities find ways to resist they obstruct investigations and hide evidence shelve complaints and silence dissent even forget their own past and deny having done so Such resistance that is the social mechanisms deployed by social groups to maintain the status quo is the bane of field researchers everywhere for it often seems to slam the door in their face How can one learn about a community when they resist so very strongly The answer is that sometimes the resistance is itself the key By closing ranks and creating obstacles community members often disclose more than they meant This book shows how such resistance manifests itself how researchers can respond to it and most importantly what it all reveals To do so *The Interloper* draws insights from diverse stories of resistance and research inquiries everything from Nazi rocket scientists to Disney union busters Harvard professors to those securing cadavers for medical school dissection to draw attention to field resistance and help analyze it Offering a window into such research for readers of many disciplines this book ultimately is intended both as a practical and theoretical guide for field researchers All these stories and more reveal a common truth When any field researcher tries to gain access to a field they are sure to meet resistance to their investigations *The Interloper* brings together all these instances of resistance that he encountered or witnessed alongside accounts from other published work The book organizes them around ideal forms of resistance and details their unique implications Ultimately *The Interloper* argues that such resistance contains way more analytical possibilities than most interlopers including field researchers envision

Difficult Questions Have Easy Answers Atina Hseham, 2023-12-06 An inquiry made to obtain any information is known as an interrogation While asking the person tries to get an answer that allows him to satisfy his doubts The interviewers often ask simple questions in a very twisted fashion to confuse the candidates Difficult questions answers reflect the knowledge of the giver as well as his overall personality For example Which is heavier a kilogram of feathers or 1000 grams of lead Solution Both the weights are equal And What happened in Kolkata yesterday from 8 to 9 o clock Solution An hour had passed These questions have a trick because they are framed in such a way that the answers seem simple but in reality they are not It can be said that the questioners confuse the candidates as they hide their answers using rhetorical resources and various devices In some cases the answer is found in the question itself but in secret Tricky questions are also used for fun or as a mental activity of logical practice Like a truck driver passing down a street in the wrong direction some policemen saw him but they didn't say anything to him why Solution Because the truck driver was on foot He shaves all day but still has a beard who is he Solution Barber Some months have thirty days and others thirty one but how many months have twenty eight Solution Every month has at least twenty eight days Which object becomes wet When it dries Solution Towel How do you draw a square with three lines Solution draw the square first and then draw three lines inside the square Thus an answer to a tricky question can lead

to confusion due to the confusion generated question These types of questions are very specific to the areas in which people's knowledge or behavior is evaluated Generally such difficult questions can be perceived as misleading or incorrect because something is being implied that is not in reality However they can also be seen as methods whose precise purpose is to test the candidate and determine whether he or she is fully capable of answering the question that he or she is saying I know In this way about five thousand questions and answers have been given in the present book which is equally useful for all competitive examinations
