Simply Better Patrick Barwise,Seán Meehan,2004 In this radically conservative book the authors advocate a back to basics approach to marketing that replaces the relentless quest for differentiation with a relentless focus on these types of basic customer needs The authors research shows that most companies have been ignoring the basics for too long At the heart of the authors approach is a view of why customers buy what they do Barwise and Meehan argue that marketers must understand what customers want from the entire product or service category So rather than focus on new luxury attributes for a specific car marketers need to understand what basic needs customers have for automobiles in general ie safety handling etc Once they figure that out they need to deliver on those basic needs better than everyone else **ProFile 1: Teacher's Book** Mark Tulip,2005-04-14 Clear introduction to business for teachers and students Global content and authentic sources Integrated video CD ROM with Student s Book Progressive language syllabus Fluency driven case studies levels 2 and 3 Complete commercial writing syllabus Video DVD available for each level **Psychology** Geoffrey Shoemsmith,2014-03-25 This book provides simple clear in depth explanations of all the topics in the AQA GCSE specification 4180 syllabus but it will prove invaluable to students at many levels on many courses and to the independent reader It can be used as a stand alone home study course as a classroom text as a reference text or just for pleasure for those who love to think about what makes people tick Psychology describes up to date research as well as some classic psychology studies and even debunks oneor two psychology research myths It leads the reader through all the topics in the syllabus as a teacher would in a classroom setting Topics are presented as a series of lessons followed by Check Your Understanding sections

which are designed to help you check and retain the information in each lesson An assessment record provided at the end of the book will help you keep track of your progress Lessons are interactive with many opportunities to jot down your thoughts and reactions reflect on how a topic relates to your own experience discuss with other people and become more involved with the material presented Students can pinpoint the topics they are studying for GCSE by using the table mapping the GCSE specification against the lessons in this book For those studying outside formal classrooms there are guidelines about how best to approach your studies The book assumes that readers have no previous knowledge of psychology and among the topics covered are Conformity and Obedience would you press a button to kill someone just because you are told to do so Many people would it seems Sex and Gender do girls and boys men and women behave so differently If so why Memory how does memory work and how accurate is it Non Verbal Communication do we reveal our true feelings in our body language Development of Personality what exactly is Anti Social Personality Disorder Prejudice and Discrimination are we bound to discriminate against people who are unlike us Learning how to remove your fear of spiders snakes flying open spaces or anything else using the principles of learning Aggression is aggression born into us Is it in our hormones Or do we learn to fight Research Methods and the Ethics of Psychology psychology is based on evidence not just ideas But what type of study constitutes good evidence and how should we treat the people in our studies
