other strategies to save precious minutes Plus tips for maintaining concentration why it's always better to guess than to leave
a question unanswered what to wear on test day and a recipe for energy boosting Sweet Tasty 800 Bars The
160-Character Solution Benjamin L. Castleman, 2015-11-15 A fascinating study that brings the power of behavioral economics
to how schools work how students learn and how we can help them succeed For decades schools have invested substantial

resources in boosting educational outcomes for disadvantaged students but those investments have not always generated positive outcomes. Although many communities have expanded school choice, for example, families often choose to keep their children in failing schools. And while the federal government has increased the size of Pell Grants, many college-bound students who would be eligible for aid never apply. Then there is the troubling trend of summer melt, in which up to 40 percent of high school graduates who have been accepted to college, mostly from underserved communities, fail to show up for the fall semester.

In *The 160 Character Solution*, Benjamin L. Castleman shows how insights from behavioral economics, the study of how social, cognitive, and emotional factors affect our decisions, can be leveraged to help students complete assignments, perform to their full potential on tests, and choose schools and colleges where they are well positioned for success. By employing behavioral strategies or nudges, Castleman shows administrators, teachers, and parents can dramatically improve educational outcomes from preschool to college. Castleman applies the science of decision making to explain why inequalities persist at various stages in education and to identify innovative solutions to improve students' academic achievement and attainment. By focusing on behavioral changes, Castleman demonstrates that small changes in how we ask questions, design applications, and tailor reminders can have remarkable impacts on student and school success.

Learning Transformed Eric C. Sheninger, Thomas C. Murray, 2017-06-06 With all that we know about how students
 learn the nature of the world they will face after graduation and the educational inequities that have existed for centuries
 maintaining a traditional one size fits all approach to teaching and learning is tantamount to instructional malpractice
 International security the success of global economies and sustainability as a global society all depend on the success of our
 education system in the years to come It s our obligation to prepare our students for their future not our past Authors Eric C
 Sheninger and Thomas C Murray outline eight keys each a piece of a puzzle for transforming the K 12 education system of

teaching and learning to intentionally design tomorrow's schools so today's learners are prepared for success and stand ready to create new industries, find new cures, and solve world problems. The traditional model of schooling ultimately prepares students for the industrial model of the past. If we want our students to become successful citizens in a global society, we must dramatically shift to a more personal approach. Failure is not an option. We can no longer wait. Let Learning Transformed show you how you can be a part of the solution. The authors encourage you to use the hashtag #LT8Keys to continue the discussion online.
