## Problem Statement

Consider equations that in undrugged coordinates are given by

$$\dot{x}_1 = f_1(x_1, x_2, x_3) + w_1,$$

$$\dot{x}_2 = f_2(x_1, x_2, x_3) + w_2,$$

$$\dot{x}_3 = f_3(x_1, x_2, x_3) + w_3,$$

where  $w_1, w_2$  and  $w_3$  are the components of the unique column vector  $w \in \mathbb{R}^3$  along the principal axes. Suppose  $w_1, w_2$  and  $w_3$  are the unique scalar signals along the principal axes and  $J_1, J_2$  and  $J_3$  are the principal axes associated with  $w$ .

Our differential equations of motion are obtained through application of Euler's theorem of moments about the principal axes. Accordingly, write

$$\sum_i \tau_i = J_1 \dot{\omega}_1 + J_2 \dot{\omega}_2 + J_3 \dot{\omega}_3,$$

where  $\sum_i \tau_i \in \mathbb{R}^3$  is the summation of all the moments applied to the object and  $J \in \mathbb{R}^{3 \times 3}$  is the inertia matrix. Suppose we assume the body fixed coordinate system aligned with the principal axes, that is

$$J = \begin{bmatrix} J_1 & 0 & 0 \\ 0 & J_2 & 0 \\ 0 & 0 & J_3 \end{bmatrix}.$$

It is also possible to write the vector product  $w \times Jw$  as a matrix equation

$$w \times Jw = [w]_{\times} (Jw),$$

Moore,Raphael Arar,2019-05-29 With recent advances in natural language understanding techniques and far field microphone arrays natural language interfaces such as voice assistants and chatbots are emerging as a popular new way to interact with computers They have made their way out of the industry research labs and into the pockets desktops cars and living rooms of the general public But although such interfaces recognize bits of natural language and even voice input they generally lack conversational competence or the ability to engage in natural conversation Today s platforms provide sophisticated tools for analyzing language and retrieving knowledge but they fail to provide adequate support for modeling interaction The user experience UX designer or software developer must figure out how a human conversation is organized usually relying on commonsense rather than on formal knowledge Fortunately practitioners can rely on conversation science

This book adapts formal knowledge from the field of Conversation Analysis CA to the design of natural language interfaces It outlines the Natural Conversation Framework NCF developed at IBM Research a systematic framework for designing interfaces that work like natural conversation The NCF consists of four main components 1 an interaction model of expandable sequences 2 a corresponding content format 3 a pattern language with 100 generic UX patterns and 4 a navigation method of six basic user actions The authors introduce UX designers to a new way of thinking about user experience design in the context of conversational interfaces including a new vocabulary new principles and new interaction patterns User experience designers and graduate students in the HCI field as well as developers and conversation analysis students should find this book of interest

**The Book of Answers** Tanya Stivers, 2022 Imagine for a moment the only way to confirm a yes/no question was by saying Yeah How different would this make our communication Relying on a large corpus of naturally occurring recordings of spontaneous social interaction this book explores all of the ways that we confirm questions in our everyday social lives Tanya Stivers analyzes what these different ways of responding allow us to do that is unique to each answer type When do we answer with Yeah rather than He is for instance or when do we use more complicated forms of confirming This information provides us with the basic response possibility space From that point we can examine what the range of responses in particular answers

tells us about what is important to us in managing social relationships through social interaction The book explains that we can conceptualize the response possibility space as having three dimensions alignment autonomy and affiliation Speakers rely on the details of their response to position themselves at a particular point in that three dimensional space sometimes accepting trade offs among the dimensions to achieve a stance that is higher in alignment and autonomy and lower in affiliation or higher in affiliation and autonomy but lower in alignment The Book of Answers uses real life conversations to find hidden patterns in how we do things together such as reach decisions tell stories or arrive at agreement or disagreement Delving into the science of how we talk this book investigates what those patterns tell us about human communication and our social lives
