Mathematical Cognition and

Understanding Katherine M. Robinson, Adam K. Dubé, Donna Kotsopoulos, 2023-05-31 This book focuses on elementary and middle school children's understanding of mathematics as well as the cognitive aspects involved in the development of mathematical knowledge skills and understanding. Children's success in and understanding of mathematics stem from factors beyond the mathematics curriculum. Researchers are increasingly becoming aware of the necessity to consider a complex set of variables when accounting for large individual differences in mathematics achievement. These chapters contribute to how both researchers and educators can consider the multidimensionality of skills involved in developing mathematical knowledge in the middle school years as well as to how this knowledge can be used to enhance practices in the mathematics classroom. Topics include the cognitive and spatial skills involved in mathematics knowledge, the role of motivation in mathematics learning, the neurological processes and development of children's mathematics skills, the development of understanding of arithmetic and fraction concepts, the factors relating to children's word problem success and techniques to promote mathematics understanding. This book and its companion Mathematical Teaching and Learning take an interdisciplinary perspective to mathematical learning and development in the elementary and middle school years. The authors' perspectives in this book draw from education, neuroscience, developmental psychology, and cognitive psychology. The book will be relevant to scholars, educators in the field of mathematics education, and also those in childhood development and cognition. Each chapter also includes practical tips and implications for parents as well as for educators and researchers.

Answers to Your Biggest Questions About Teaching Elementary Math John J. SanGiovanni, Susie Katt, Latrenda D. Knighten, Georgina Rivera, 2021-09-09 Your guide to grow and learn as a math teacher. Let's face it: teaching elementary math can be hard. So much about how we teach math today may look and feel different from how we learned it. Today we recognize placing the student at the center of their learning increases engagement, motivation, and academic achievement soars. Teaching math in a student-centered way changes the role of the teacher from one who traditionally delivers knowledge to one who fosters thinking. Most importantly, we must ensure our practice gives each and every student the opportunity to learn, grow, and achieve at high levels while providing opportunities to develop their agency and authority in the classroom, which results in a positive math identity. Whether you are a brand new teacher or a veteran, if you find teaching math to be quite the challenge, this is the guide you want by your side. Designed for just-in-time learning and support, this practical resource gives you brief, actionable answers to your most pressing questions about teaching elementary math. Written by four experienced math educators representing diverse experiences, these authors offer the practical advice they wish they received years ago from lessons they've learned over decades of practice, research, coaching, and through collaborating with teams, teachers, and colleagues, especially new teachers every day. Questions and answers are organized into five areas of effort that will help you most thrive in your elementary math classroom:

1. How do I build a positive math community?
2. How do I structure, organize, and manage my math class?
3. How do I engage my students in math?
4. How do I

help my students talk about math 5 How do I know what my students know and move them forward Woven throughout you'll find helpful sidebar notes on fostering identity and agency access and equity teaching in different settings and invaluable resources for deeper learning The final question Where do I go from here offers guidance for growing your practice over time Strive to become the best math educator you can be your students are counting on it What will be your first step on the journey

School Achievement and Failure in Portuguese and Spanish Speaking Countries Edgar Galindo, Adelinda A. Candeias, Heldemerina S. Pires, Miguel Ángel Carbonero, 2018-08-31 This book is devoted to an increasingly important educational problem in the modern societies school achievement and failure School failure is presently a problem in developed as well as in developing countries In the Spanish and Portuguese speaking countries in Europe and Latin America school achievement and failure is consequently an important topic of political social and scientific discussion The following papers revise the latest research in the field from the perspective of Psychology

Identity and Symbolic Interaction Richard T. Serpe, Robin Stryker, Brian Powell, 2020-04-22 This book examines identity theory's centrality within social psychology and its foundations within structural symbolic interaction highlighting its links not only to other prominent sociological subfields but also to other theoretical perspectives within and beyond sociology The book provides a synthetic overview outlining the intellectual lineage of identity theory within structural symbolic interactionism and how the Indiana School of identity theory and research associated especially with Sheldon Stryker relates to other symbolic interactionist traditions within sociology It also analyses the latest developments in response to the push to integrate identity

theory which initially focused on role identities with the study of personal group and social identities Further it discusses the relationship between identity theory and affect control theory providing a sense of the many substantive topics within sociology beyond social psychology for which the study of identity has important sometimes underappreciated implications The book concludes with a chapter summarizing the interrelated lessons learned while also reflecting on remaining key questions and challenges for the future development of identity theory
