Teacher Emotions Matter: Nature, Antecedents, and Effects Junjun Chen, Hongbiao Yin, Anne Christiane Frenzel, 2021-01-05

When Teaching Writing Gets Tough Annamary Consalvo, Ann D. David, 2024 Writing instruction is a particular challenge because there is no singular linear solution to teaching students to write well This book approaches writing as a wicked problem that takes place in complicated contexts Through both scholarly research and teacher reflection it examines ELA classrooms and the experiences of writing teachers to identify approaches that have proven effective with adolescents The book uses wickedity to frame the problems of teaching writing and offers context specific solutions enacted by teachers While it addresses the realities of standardized ways of teaching and assessing writing the book also highlights the deep professional knowledge and practical strategies teachers bring to writing instruction in middle and high school classrooms Chapters grapple with tensions between testing and authenticity assessing writing in nuanced ways and finding enjoyment in the work of teaching writing amid and alongside persistent complexities Specific topics include students writing process revision students as decision makers multimodal writing assessment and writer s notebooks data driven instruction the high school to college transition and teacher professional development Book Features Includes examples of how teachers approach specific challenges associated with teaching writing to adolescents analyzing how and why their solutions proved effective Focuses on students engaged in writing in classrooms teachers implementing writing strategies and professional learning Offers a range of relevant voices on the topic of writing instruction with authors that include classroom teachers and scholars

Handbook of Research on the Impact of COVID-19 on Marginalized Populations and Support for the Future Wahab, Haris Abd, Chowdhury, Jahid Siraz, Ah, Siti Hajar Binti Abu Bakar, Mohd Saad, Mohd Rashid, 2021-06-11 The COVID 19 pandemic has posed significant risks to particular communities and individuals including indigenous communities migrant workers refugees transgender individuals and the homeless population The disadvantaged population is overwhelmed by deprivation inequality unemployment and infections both communicable and

non communicable which make them more vulnerable to COVID 19 and its negative consequences These marginalized groups struggle to obtain an admirable political representation and face marginalization and lack of access to health education and social services It is imperative that these marginalized groups and their right to life and their livelihoods are supported especially when they are put at risk during global crises such as the COVID 19 pandemic The Handbook of Research on the Impact of COVID 19 on Marginalized Populations and Support for the Future represents a way of acknowledging an improved pandemic free and prosperous environment for everyone in the future where society does not leave behind any poor or marginalized individuals The book is a representation of the voice of the marginalized people in the new normal attempting to draw on a comprehensive knowledge bank which includes anthropology sociology gender studies media education indigenous dimension philosophy bioethics care ethics and more This book focuses solely on the marginalized people examines the oppressed communities in depth and provides insights on how we should stand by these vulnerable people This book is a valuable tool for social workers government bodies policymakers social justice advocates human rights activists researchers in gender and race studies practitioners academicians and students interested in how COVID 19 has impacted marginalized populations and how social justice can be advocated for in the future

Abiotic Stress Signaling in Plants: Functional Genomic Intervention, Volume II Girdhar Kumar Pandey, Ashish Kumar Srivastava, Amita Pandey, Maik Böhmer, 2024-01-31 This Research Topic is part of the Abiotic Stress Signaling in Plants Functional Genomic Intervention series Abiotic Stress Signaling in Plants Functional Genomic Intervention Abiotic stresses such as high temperature low temperature drought and salinity limit crop productivity worldwide Understanding plant responses to these stresses is essential for rational engineering of crop plants In Arabidopsis the signal transduction pathways for abiotic stresses light several phytohormones and pathogenesis have been elucidated A significant portion of plant genomes most studies are Arabidopsis and rice genome encodes for proteins involved in signaling such as receptor sensors kinases phosphatases transcription factors and transporters channels Despite decades of physiological and molecular effort knowledge pertaining to how plants sense and transduce low and high temperature low water availability drought water submergence and salinity signals is still a major question before plant biologist One major constraint hampering our understanding of these signal transduction processes in plants has been the lack or slow pace of application of molecular genomic and genetics knowledge in the form of gene function
