Inventory Management Mohamad Y. Jaber, 2009-08-11 As markets become more dynamic and competitive, companies must reconsider how they view inventory and make changes to their production and inventory systems. They must begin to think outside the classical box and develop a new paradigm of inventory management. Exploring the trend away from classical models based on economic order quantities to depend on

Industrial Engineering: Innovative Networks Suresh P. Sethi, Marija Bogataj, Lorenzo Ros-McDonnell, 2012-01-03 The Spanish Conference of Industrial Engineering (Ingeniería de Organización Industrial CIO) is an annual meeting promoted by Asociación para el Desarrollo de la Ingeniería de Organización Industrial Engineers Association ADINGOR. The aim of CIO is to establish a forum for the open and free exchange of ideas, opinions, and academic experiences about research, technology transfer, or successful business experiences in the field of Industrial Engineering. The Scientific Committee is composed by 68 international referees, and we foresee the attendance of some 200 people from more than 15 countries. Following the rotation of venue and organization between various Spanish universities, the 2011 Conference will be the fifteenth National Conference and the fifth International Conference in Cartagena. During three days, the 2011 Conference will include the participation of European and other foreign countries' researchers and practitioners that will present communications reproduced in this volume on a range of topics including Production and Operations Business Management, Supply Chain Management, Economic environment, Technological and Organizational Innovation, and Management and Innovation in Education. The Conference on Industrial Engineering CIO and its proceedings are an excellent platform for the dissemination of the outputs of the scientific projects developed in the frame of the European national or regional Research and Development plans.

Multicriteria Analysis in Finance Michael Doumpos, Constantin Zopounidis, 2014-04-10 This book provides a concise introduction into the fundamentals and applied techniques of multiple criteria decision making in the finance sector. Based on an analysis of the nature of financial decisions and the general methods of financial modelling, risk management, and financial engineering, the book introduces portfolio management, banking management, and credit scoring. Finally, the book presents an overview of further applications of multi-criteria analysis in finance and gives an outlook on future perspectives for the application of MCDA in finance.
