2012 GCSE English results Great Britain: Parliament: House of Commons: Education Committee, 2013-06-11 The 2012 GCSE English results prompted significant controversy which ultimately resulted in an application for judicial review This report sets out the background to these events and identifies lessons to be learned The problems with GCSE English can be traced back to the 2007/09 development phase of the qualification in particular the turbulence which resulted from the shift away from a mostly linear to a modular system combined with a high proportion of controlled assessment and generous marking tolerances Exam board experts raised concerns at the time but these were not acted upon by the regulator the then interim Ofqual Further difficulties arose because of pressures from the school accountability system The problems experienced with GCSE English in 2012 highlighted serious weaknesses in the moderation of speaking and listening with consequences for grade awarding The current status of Ofqual as an independent regulator accountable to Parliament is the right one However the Coalition Government is bringing in wholesale changes to GCSEs and A levels to a tight timetable and at the same time Ofqual must have systems in place The Committee is also concerned that there is a rush towards separate exam systems for England Wales and Northern Ireland without careful reflection on what might be lost or consensus that this is the right thing to do

Sociology and Social Work Jo Cunningham, Steve Cunningham, Alice O'Sullivan, 2022-09-23 Sociological perspectives can be used to analyse societal and structural influences on human behaviour at individual group and community levels The authors link sociological concepts debates and theories relating to key areas such as poverty social exclusion education social class and social justice to develop your students understanding of how sociological perspectives will impact upon their social work placements and practice This book begins by taking you step by step through the ins and outs of why sociology is important to social work It explains the relevance of sociology to everyday social work practice introducing you to the core

sociological perspectives that you'll need to get to grips with during your course including functionalism Marxism symbolic interactionism and postmodernism The book then moves on to explore various social issues in detail i.e. poverty social class social exclusion education moral panics with extended case studies activities and links to skills in practice illustrating the many opportunities and challenges that each aspect brings to everyday practice There are also important chapters on family community and the role of sociology in social work training

The Trouble with Maths Steve Chinn, 2013-07-03 Now in a second edition the award winning *The Trouble with Maths* offers important insights into the often confusing world of numeracy By looking at learning difficulties in maths from several perspectives including the language of mathematics thinking styles and the demands of individual topics this book offers a complete overview of the most common problems associated with mathematics teaching and learning It draws on tried and tested methods based on research and the author's many years of classroom experience to provide an authoritative yet highly accessible one stop classroom resource Combining advice guidance and practical activities this user friendly guide will enable you to develop flexible thinking skills use alternative strategies for pupils to access basic facts understand the implications of pre requisite skills such as working memory on learning implement effective preventative measures before disaffection sets in recognise maths anxiety and tackle self esteem problems tackle the difficulties with word problems that many pupils may have select appropriate materials to enhance understanding With useful features such as checklists for the evaluation of books an outline for setting up an inclusive Maths Department policy and a brand new chapter on materials manipulatives and communication this book will equip you with the essential skills to tackle your pupils maths difficulties and improve standards This book will be useful for all teachers classroom assistants learning support assistants and parents who have pupils that underachieve with maths

House of Commons - Culture, Media and Sport Committee: Supporting The Creative Economy - Volume I: HC 674 Great Britain: Parliament: House of Commons: Culture, Media and Sport Committee, 2013-09-26 This report warns that the extraordinary success of the UK's creative industries may be jeopardised by any dilution of intellectual property rights and the failure to tackle online piracy The Committee also strongly condemns the failure of

Google in particular to tackle access of copyright infringing websites through its search engine Such illegal piracy combined with proposals arising from the Hargreaves review to introduce copyright exceptions and a failure to strengthen copyright enforcement as envisaged by the Digital Economy Act 2010 together threaten the livelihoods of the individuals and industries that contribute over 36 billion annually to the UK economy Also the Olympics No Marketing Rights scheme is excessively restrictive and is preventing British creative companies from realising the benefits they deserve from the Olympic legacy The Committee calls for a central champion of Intellectual Property in Government to promote and protect the interests of UK intellectual property the maximum penalty for serious online IP theft to be increased to 10 years imprisonment in line with the punishment for such offences in the physical world more evidence and scrutiny before any exceptions to copyright such as those suggested by Hargreaves are applied redoubled efforts to ensure that the video games tax credit is approved by the European Commission and introduced as soon as possible reforms to the income tax and tax reliefs systems to recognise adequately the freelance nature of much creative work greater recognition of the importance of arts subjects in the curriculum

The Armed Forces Covenant in action? Great Britain: Parliament: House of Commons: Defence Committee,2013-07-18 A series of Ofsted inspections on Army Apprenticeships conducted in 2013 rated the overall effectiveness as good This was an improvement over the last inspection in 2009 rated as satisfactory now called requires improvement Some 28 per cent of Army recruits were less than 18 years of age Further information is needed on why the Army is so dependent on recruiting personnel under the age of 18 years compared to the other two Services and whether steps are being taken to reduce this dependency Of those recruited in 2012 3 5 per cent of the Army were rated at entry level 2 for literacy that of a 7 to 8 year old and 39 per cent had a literacy level of an eleven year old If as the MoD states it has to recruit personnel at whatever level of attainment is available then it should boost remedial action when recruitment entry standards are particularly low In light of changes brought about by Future Force 2020 it may be that recruiting personnel with higher levels of attainment would better meet the future needs of the Armed Forces Whilst the Committee recognises that some recruits may not be eager to take further academic exams the MoD should encourage more recruits to undertake English and Maths GCSEs which would stand them in good stead for future employment The MoD has carried out some useful pilot projects with paramedic training and should identify more potential projects to ensure that vital skills paid for by the MoD are not lost to the country

4-Speed Revision for Edexcel Gcse Maths Modular Higher Keith Pledger,Gareth Cole,Peter Jolly,Graham Newman,2008-01-23 Includes colour coded pages that help students revise at the speed they need This book highlights the sub topics most likely to be tested in the exam It decodes the maths language used in exam papers Practice questions and tests indicate the grade students are working at It includes exam style practice papers written by examiners

Mathematics in Early Years Education Ann Montague-Smith,Tony Cotton,Alice Hansen,Alison J.

Price,2013-03-05 This third edition of the best selling Mathematics in Nursery Education provides an accessible introduction

to the teaching of mathematics in the early years Covering all areas of mathematics learning number and counting calculation pattern shape measures and data handling it summarises the research findings and underlying key concepts and explains how adults can help children to learn through practical experiences discussion and more direct intervention This new edition has been fully updated to incorporate the latest research and thinking in this area and includes why mathematics is important as a way of making sense of the world how attitudes to mathematics can influence teaching and learning how children learn mathematics new material on sorting matching and handling data ideas for observation and questioning to assess children s understanding examples of planned activities suggestions for language development assessment criteria This textbook is ideal for those training to be teachers through an undergraduate or PGCE route those training for Early Years Professional Status and those studying early childhood on foundation or honours degrees as well as parents looking to explore how their young children learn mathematics This will be an essential text for any Early Years practitioner looking to make mathematics interesting exciting and engaging in their classroom

Early Years Science Education Mike Watts, Alison Silby, 2020-04-28 The educational provision for early years is growing and changing across many parts of the world not least in the UK While this book leans heavily on the mounting literature on early child development in its broadest sense physically emotionally linguistically its central focus lies squarely on the growth of children s scientific thinking and activities Written by educators this book is based both on formal educational research and professional practice in action The authors describe children s science concept development their curiosity driven exploration emergent ecological literacy their learning through science play the assessment of early learning the role of parents and practitioners within early education contexts and some question the very basis of the science being taught Illustrations and examples of practice are not confined to the UK though the messages to be derived from each chapter have application way beyond the immediate context This book was originally published as a special issue of Early Child Development and Care
