Psychological and Behavioral Examinations in Cyber Security McAlaney, John, Frumkin, Lara A., Benson, Vladlena, 2018-03-09 Cyber security has become a topic of concern over the past decade. As many individual and organizational activities continue to evolve digitally, it is important to examine the psychological and behavioral aspects of cyber security. *Psychological and Behavioral Examinations in Cyber Security* is a critical scholarly resource that examines the relationship between human behavior and interaction and cyber security. Featuring coverage on a broad range of topics such as behavioral analysis, cyberpsychology, and online privacy, this book is geared towards IT specialists, administrators, business managers, researchers, and students interested in online decision making in cybersecurity. [A Woman's Guide to Navigating a Successful Career in Healthcare Information Technology](#) Jeffery Daigrepoint, 2024-06-19 This book features over 50 of the industry's brightest female pioneers who share insightful lessons backed by several years of experience, as well as tips for navigating a successful career in HIT. The intent of this book is to provide the opportunity to capture stories from highly successful women to inspire the next generation who want to pursue a career in HIT and to inspire those already working in the field who are eager to advance in their careers. This book also provides insights on industry opportunities, ways to deal with harassment, the history of female tech innovators, and negotiating competitive salary and employment agreements. Additional industry experts provided guidance on tapping into venture capital funding and tools for career development. A comprehensive resource guide and glossary of industry terms are also included. Co-authors included Amy Sabillon, MSI, Ayanna Chambliss, CAP, SHRM, CP, Lindsay Rowlands, MHA, and Stacey B. Lee, JD. *Proceedings of Fifth International Conference on Computing, Communications, and Cyber-Security* Paulo J. Sequeira Gonçalves, Pradeep Kumar Singh, Sudeep Tanwar, Gregory Epiphaniou, 2024-12-04 This book features selected research papers presented at the Fifth International Conference on Computing, Communications, and Cyber Security (IC4S 05 Volume 2) organized in India during 8th-9th April 2024. The conference was hosted at GEHU Bhimtal Campus in India. It includes innovative work from researchers, leading innovators, and professionals in the areas of communication and network technologies, advanced computing technologies, data analytics, and intelligent learning, the latest electrical and electronics trends, and security and privacy issues. The work is presented in two volumes. [Cybersecurity in the Age of Artificial Intelligence](#) Pasi Koistinen, 2025-07-12 Artificial intelligence has stopped knocking politely on the door of cybersecurity; it has kicked it open, set up shop inside, and begun rewriting the rules. From generative phishing emails indistinguishable from trusted colleagues to adaptive malware that evolves faster than defenders can react, AI has made the threat landscape faster, smarter, and far less predictable. This book is a practical guide to that unsettling reality. It doesn't trade in hype or hand-waving optimism. Instead, it lays out in plain language how AI systems create new risks, what happens when security practices built for deterministic software fail, and why human vigilance and organizational discipline are more important than ever. Inside, you'll discover how attackers are already

using AI to automate reconnaissance generate malicious code and industrialize social engineering at a scale no human team could match Why defending AI is a fundamentally different challenge with attack surfaces embedded in training data model weights and seemingly innocuous prompts How familiar safeguards like static rules perimeter defenses and blacklists fall apart when faced with systems that learn infer and sometimes hallucinate What it takes to design secure trustworthy AI systems from threat modeling and auditing pipelines to deploying explainable models that don't sacrifice accountability for convenience Written for security leaders engineers policymakers and technologists who recognize that the convergence of AI and cybersecurity isn't theoretical it's already operational this book offers a strategic roadmap for navigating a landscape where yesterday's defenses are no longer enough You'll explore real world case studies chatbots leaking confidential data with alarming politeness AI driven phishing campaigns that slip past even well trained employees and defensive models that fail silently because they can't explain their own reasoning Along the way you'll learn frameworks to separate the promising from the perilous the actionable from the aspirational Artificial Intelligence Cybersecurity isn't a manual for fine tuning models or a primer for beginners It assumes you already sense that something is shifting and provides the clarity examples and strategies to respond If you're responsible for securing critical systems or shaping the policies that govern them this book will help you ask better questions make better decisions and avoid the costly mistake of treating AI as just another line item in your technology stack Because in this new era the question isn't whether AI will reshape your security strategy The question is whether you'll be ready when it does

Advances in Teaching and Learning for Cyber Security Education Phil Legg, Natalie Coull, Charles Clarke, 2024-12-27 This book showcases latest trends and innovations for how we teach and approach cyber security education Cyber security underpins the technological advances of the 21st

century and is a fundamental requirement in today's society. Therefore, how we teach and educate on topics of cyber security and how we overcome challenges in this space require a collective effort between academia, industry, and government. The variety of works in this book include AI and LLMs for cyber security, digital forensics, and how teaching cases can be generated at scale. Events and initiatives to inspire the younger generations to pursue cyber pathways, assessment methods that provoke and develop adversarial cyber security mindsets, and innovative approaches for teaching cyber management concepts. As a rapidly growing area of education, there are many fascinating examples of innovative teaching and assessment taking place. However, as a community, we can do more to share best practice and enhance collaboration across the education sector. CSE Connect is a community group that aims to promote sharing and collaboration in cyber security education so that we can upskill and innovate the community together. The chapters of this book were presented at the 4th Annual Advances in Teaching and Learning for Cyber Security Education conference hosted by CSE Connect at the University of the West of England, Bristol, UK, on July 2, 2024. The book is of interest to educators, students, and practitioners in cyber security, both for those looking to upskill in cyber security education as well as those aspiring to work within the cyber security sector.

International Conference on Applications and Techniques in Cyber Security and Intelligence ATCI 2018 Jemal Abawajy, Kim-Kwang Raymond Choo, Rafiqul Islam, Zheng Xu, Mohammed Atiquzzaman, 2018-11-05. The book highlights innovative ideas, cutting-edge findings, and novel techniques, methods, and applications touching on all aspects of technology and intelligence in smart city management and services. Above all, it explores developments and applications that are of practical use and value for Cyber Intelligence-related methods, which are frequently used in the context of city management and services.
