

Exploring the Periodic Table

1. Columns and Rows

The periodic table is divided into three main sections: **metals**, **non-metals**, and **metalloids**. Elements are further organized into columns which are called **families**. Like all families, elements in the same family share similar physical and chemical properties.

The periodic table is also organized by horizontal rows or **periods**. These elements are not in the same family but there are patterns based on atomic size and reactivity.

In this activity you will work to find patterns or trends in the elements in the periodic table.

SUMMARY:

a) What is the name of the columns of the periodic table?

b) How are all the elements in the same column similar?

c) What is the name of the rows of the periodic table?

2) Solids, Liquids and Gases

Look at the periodic table at the back cover of the textbook. The Key identifies all the important information about atomic number, atomic mass, the chemical symbol, the state at room temperature and the ionic charge for each element.

a) Which colour print represents solids? _____

b) Which colour print represents liquids? _____

c) Which colour print represents gases? _____

d) Which elements are gases at room temperature? _____

e) Name two elements that are liquids at room temperature.

The series follows the 5E model: engage, explore, explain, elaborate, evaluate. The Matter kit provides a complete inquiry model for the exploration of the structure and properties of matter through supported investigation. Encourage students through activities such as studying the chemical properties of matter and investigating whether household items are acids and bases. Matter kit includes 16 Inquiry Cards in print and digital formats, Teacher's Guide, Inquiry Handbook. Each kit includes a single copy; additional copies can be ordered. Digital resources include PDFs of activities and additional teacher resources including images and assessment tools, leveled background pages for students, and video clips to support both students and teachers.

Glencoe Physical Science, 1999 **The Pillars of Knowing: From Innocence to Revelation** Pasquale De Marco,2025-08-15 In this captivating journey of exploration, we embark on a quest to unravel the mysteries of the universe, from the vastness of the cosmos to the intricacies of the human mind. Through the lens of science and philosophy, we delve into the fundamental principles that govern our existence, seeking answers to questions that have puzzled humanity for millennia. With curiosity as our compass, we traverse the realms of physics, cosmology, biology, and consciousness, uncovering the secrets that lie hidden within. We explore the symphony of forces that orchestrate the universe, from the elegance of Einstein's relativity to the enigmas of quantum mechanics. We journey to the farthest reaches of space, seeking to understand the origins and fate of our cosmos. And we delve into the depths of the human experience, unraveling the mysteries of consciousness, free will, and the nature of reality. Along the way, we encounter paradoxes and contradictions, pushing the boundaries of human knowledge and understanding. We confront the limits of our perception and the vastness of the unknown, acknowledging that there are some mysteries that may forever remain beyond our grasp. But we also embrace the wonder and awe that accompany the pursuit of knowledge, finding beauty and inspiration in the intricate tapestry of existence. Written with clarity and passion, this book is an invitation to join a grand odyssey of discovery, to explore the frontiers of human understanding, and to marvel at the extraordinary complexity of the universe we inhabit. It is a celebration of the human spirit, our relentless quest for knowledge, and our unwavering belief in the power of the human mind to unravel the mysteries of existence.
