covers the whole system of Socialism with Chinese Characteristics dealing with Deng Xiaoping's theory, the socialist market economy, a moderately well-off Xiaokang society, China's practice and theory of socialist democracy, human rights, and Xi Jinping's Marxism. In short, the resolute focus is the Reform and Opening Up. Socialism with Chinese Characteristics is one of the most important global realities today. However, the concept and its practice remain largely misunderstood outside China. This book sets to redress such a lack of knowledge by making available to non-Chinese speakers the sophisticated debates and conclusions in China concerning socialism with Chinese Characteristics. It presents this material in a way that is both accessible and thorough. *Guide to Microforms in Print*, 1993 **Socialist Models of Development** Charles K.

Wilber, Kenneth P. Jameson, 2013-10-22 *Socialist Models of Development* covers the theories and principles in socialism development. This book discusses the social evolution of different countries and the historical backgrounds that influence such evolution. The opening sections deal with the socialism and economic appraisal of Burma, Iraq, Syria, Tanzania, and Africa. These topics are followed by discussions of the prospects and problems of the transition from Agrarianism to Socialism of some countries including Angola, Guinea-Bissau, and Mozambique. Other sections examine the Socialist Cuba and the intermediate regimes of Jamaica and Guyana. The North Korean model of socialism, a comparative study of Romanian socialism and Greece capitalism, as well as a socialist model of economic development of the Polish and Bulgarian, are presented. The concluding sections are devoted to the role of management in socialist development and to the agricultural productivity under socialism. The book can provide useful information to sociologists, political analysts, students, and researchers. **Challenge of Freedom** Roger LaRaus, Harry P.
