ECAI 2014 T. Schaub, G. Friedrich, B. O'Sullivan, 2014-08 The role of artificial intelligence AI applications in fields as diverse as medicine economics linguistics logical analysis and industry continues to grow in scope and importance AI has become integral to the effective functioning of much of the technical infrastructure we all now take for granted as part of our daily lives This book presents the papers from the 21st biennial European Conference on Artificial Intelligence ECAI 2014 held in Prague Czech Republic in August 2014 The ECAI conference remains Europe's principal opportunity for researchers and practitioners of Artificial Intelligence to gather and to discuss the latest trends and challenges in all subfields of AI as well as to demonstrate innovative applications and uses of advanced AI technology Included here are the 158 long papers and 94 short papers selected for presentation at the conference Many of the papers cover the fields of knowledge representation reasoning and logic as well as agent based and multi agent systems machine learning and data mining The proceedings of PAIS 2014 and the PAIS System Demonstrations are also included in this volume which will be of interest to all those wishing to keep abreast of the latest developments in the field of AI

Adult Responses to Popular Music and Intergenerational Relations in Britain, c. 1955-1975 Gillian A. M. Mitchell, 2019-02-28 Adult Reactions to Popular Music and Inter generational Relations in Britain 1955-1975 challenges stereotypes concerning a post war generation gap exacerbated by rebellion inducing popular music styles by demonstrating the considerable variety which frequently characterized adult responses to the music whilst also highlighting that the impact of the music on inter generational relations was more complex than is often assumed NP Utilizing extensive primary evidence from first person accounts to newspapers television programmes surveys and archive collections the book adopts a thematic approach identifying three key arenas of British society in which adult responses to popular music and the impact of such reactions upon relations between generations seem particularly revealing and significant The book examines in detail the place of popular music within family life and Christian churches and their engagement with popular music particularly within youth clubs It also explores encounters between the worlds of traditional Variety entertainment and popular music while providing broader perspectives on this most dynamic and turbulent of periods

Regulation of Inflammation, Its Resolution and Therapeutic Targeting
 Mariagrazia Uguccioni, Mauro Martins Teixeira, Massimo Locati, Alberto Mantovani, 2018-01-11 Inflammation is a fundamental protective mechanism and at the same time the driving force of a variety of major diseases in humans Indeed acute self resolving inflammation usually plays a positive role for the host as exemplified by infectious diseases where its positive role is well established and testified by its perception as innate immunity On the other hand non resolving inflammation and consequent chronicization is a key determinant of immunopathology and clinical manifestations of most major diseases in humans As a consequence it is increasingly appreciated that the problem with inflammation is not how often it starts but how often it fails to resolve Appropriate resolution of inflammatory responses which also drives activation of tissue damage repair mechanisms and return of local tissues to homeostasis is a necessary process for ongoing health Interestingly cells sustaining these processes are also key to the proinflammatory responses and the underlying pro resolving molecular pathways are triggered as part of the pro inflammatory response This clearly indicates resolution of inflammation as an active process requiring functional repolarization of inflammatory cells that calls our attention on the underlying molecular mechanisms The increasing number of anti inflammatory drugs best sellers in the pharma market is a clear indication of the relevance of having inflammation under check nonetheless there is still a great need for better acting pharmacological tools for the control of inflammation Indeed the remarkable success of biological drugs targeting proinflammatory cytokines has indicates that tools able to block proinflammatory mediators have promising applications but at the same time has made clear that there are intrinsic limitations to this approach which frequently vanish undermine the activity of single targeting drugs including the well known redundancy of inflammatory mediators Under self limiting conditions inflammation spontaneously resolves in an active process Some cellular and molecular mechanisms involved in inflammation resolution have been

uncovered in the recent past and include generation of specific cytokines apoptosis of inflammatory leukocytes lipid mediators macrophage repolarization and others are likely to be revealed in the next future since loss of function mutations of an increasing number of genes results in the development of spontaneous inflammation in experimental animals We argue that pushing for inflammation resolution by exploiting active naturally occurring pro resolving processes may have significant advantages over the attempt to simply push back inflammation by passive blockade of proinflammatory mediators At present the research in the field of inflammation aims at identifying and validates new molecules involved in the resolution of inflammation as a basis for the development of innovative therapeutic strategies in chronic inflammatory and autoimmune diseases This involves the discovery of new natural or synthetic pro resolving molecules from plant and animals and the investigation of endogenous inflammation pro resolving mechanisms including atypical chemokine receptors decoy receptors and microRNA An extensive effort is focused on the regulation by pro resolving agents on two molecular systems of key relevance in inflammation the chemokine system which regulates recruitment permanence and egress of leukocyte in tissues and the Toll Like Receptor TLR IL 1R system which is central for the activation of infiltrating leukocytes

Handbook of Research on Green Economic Development Initiatives and Strategies Erdo?du, M. Mustafa, Arun, Thankom, Ahmad, Imran Habib, 2016-06-27 Climate change is one of the most pressing issues facing the world today as it affects all sectors of life be it global economics or human rights activism timely action is required to avoid global catastrophe Understanding the importance of climate change mitigation renewable energies clean technologies and green development has become necessary for effective leadership The Handbook of Research on Green Economic Development Initiatives and Strategies provides the necessary information to reduce the climate change vulnerability of socio economic systems in the most cost effective manner This handbook of research is ideal for policy makers non governmental organizations NGOs government agencies businesses and professionals looking to temper the effects of climate change **Auditory Brainstem Evoked Potentials** Ananthanarayan Krishnan, 2021-10-06 Auditory Brainstem Evoked Potentials Clinical and Research Applications provides a solid foundation of the theoretical principles of auditory evoked potentials This understanding is important for both the development of optimal clinical test strategies and interpretation of test results Developed for graduate level audiology students this comprehensive text aims to build a fundamental understanding of auditory evoked brainstem responses ABR and their relationship to normal and impaired auditory function as well as its various audiologic and neurotologic applications In addition to covering the classical onset ABR the book provides a thorough review of sustained brainstem responses elicited by complex sounds including auditory steady state response ASSR envelope following response EFR and frequency following response FFR and the growing clinical and research applications of these responses By exploring why certain stimulus manipulations are required to answer specific clinical questions the author provides the resources needed for students and clinicians to make reasoned decisions about the optimal protocol to use in a given situation Key Features A full chapter devoted to laboratory exercises Numerous illustrations to help explain key concepts Description of neural bases underlying amplitude and latency changes Troubleshooting techniques End of chapter summaries Database Systems for Advanced Applications Jian Pei, Yannis Manolopoulos, Shazia Sadiq, Jianxin Li, 2018-05-11 This two volume set LNCS 10827 and LNCS 10828 constitutes the refereed proceedings of the 23rd International Conference on Database Systems for Advanced Applications DASFAA 2018 held in Gold Coast QLD Australia in May 2018 The 83 full papers 21 short papers 6 industry papers and 8 demo papers were carefully selected from a total of 360 submissions The papers are organized around the following topics network embedding recommendation graph and network processing social network analytics sequence and temporal data processing trajectory and streaming data RDF and knowledge graphs text and data mining medical data mining security and privacy search and information retrieval query processing and optimizations data quality and crowdsourcing learning models multimedia data processing and distributed computing Advanced Concepts in Human Immunology: Prospects for Disease Control Pooja Jain, Lishomwa C. Ndhlovu, 2020-08-11 This book highlights

information derived primarily from clinical samples with particular reference to theoretical and scientific aspects of the human immune system This text will focus on topics that range from host pathogen interactions in infectious disease to host immune response in cancer allergic diseases neuroinflammatory diseases and autoimmune disorders The reader will also have a well rounded understanding of the behavior of the immune system with particular emphasis on the role of immunoproteomics in immunotherapy neuroprotective immunity for neurodegenerative and neuroinfectious disease leukemia associated dendritic cell induction of adaptive immunity dysregulation and the role of immune checkpoint inhibitors in cancer infection as well as neuroinflammation Taken together the contents of this book are intended for both clinicians and researchers in academia and industry Modern Pupillometry Megan H. Papesh, Stephen D. Goldinger, 2024-05-26

Pupillometry the study of the eyes pupils has a rich history dating back to the 1800s For example to appear dark with desire women once used atropa belladonna deadly nightshade as a cosmetic because the atropine dilated their pupils making them appear more romantically aroused We now know that this relationship is largely driven by the activity of the sympathetic nervous system specifically a small brainstem nucleus known as the locus coeruleus LC Because of tight connections between the musculature of the eyes and LC monitoring the pupils can reveal important insights into brain activity during mental processes Many of these processes are related to attention and arousal cognitive or emotional with the LC controlling mental readiness via secretion of the neurotransmitter norepinephrine While these complicated neurochemical processes happen in the brain they are often overtly observable via pupil dilation Although pupillometry was popular in the 1960s and 1970s it fell out of favor until experiencing a renaissance approximately 10 years ago With the advent of new eye tracking and neural recording technology measuring and analyzing pupil size is now easier than ever Because all modern eye trackers use pupil size in the calculation of gaze location they also provide researchers with moment by moment pupil size measures in output files Although previously considered extra data to support gaze location analyses researchers have begun to conduct eye tracking studies solely to gain access to pupil size data These data have been used to study thought processes in many domains including cognitive science psychopathologies business marketing security contexts and the study of addiction The diversity of interest in pupillometry is matched by the diversity in approaches taken to data collection analysis and interpretation To date there exists no book or tutorial review devoted specifically to ensuring that researchers carry out rigorous and reproducible work across these varied domains *Modern Pupillometry Cognition Neuroscience and Practical Applications* fills this gap by exploring the history neuroscience and methodological considerations of pupillometry research within and beyond psychology *Genetics and Genomics of Plant Reproduction for Crop Breeding* Gianni Barcaccia, Luciana Baldoni, Marta Adelina Mendes, Emidio Albertini, Fulvio Pupilli, Andrea Mazzucato, Sara Zenoni, Silvia Vieira Coimbra, Antonio Granell, Dabing Zhang, 2020-07-28 *Exploring classroom assessment practices and teacher decision-making* Dennis Alonzo, Chris Davison, Chris Ann Harrison, 2023-05-25 **Interaction of Nanomaterials with the Immune System** James

C. Bonner, Jared M. Brown, 2020-01-30 This book covers the latest information related to understanding immune responses to engineered nanomaterials ENMs Many ENMs used in both the consumer and biomedical fields have been reported to elicit adverse immune responses ranging from innate immune responses such as complement activation to changes in adaptive immunity that influence pathogen responses and promote disease states such as asthma Interaction of Nanomaterials with the Immune System covers the most up to date information on our understanding of immune responses to ENMs across a wide range of topics including innate immunity allergic immune responses adaptive provides the reader with 1 up to date understanding of immune responses to ENMs 2 current testing methods and 3 appropriate models including alternative testing strategies for evaluating immunotoxicity of ENMs Computers and Society Ronald M. Baecker, 2019 Computers and Society explores the history and impact of modern technology on everyday human life considering its benefits drawbacks and repercussions Particular attention is paid to new developments in artificial intelligence and machine learning and the issues that have arisen from our complex relationship with AI **Pediatric Ophthalmology in the Emergency Room** Roman Shinder, 2020-10-06 This book aims to cover the important pediatric ophthalmic diagnoses that present in the emergency room A collaborative work of experienced experts it describes the history examination testing epidemiology pathogenesis treatment and prognosis for a variety of disorders Richly illustrated the book offers an invaluable tool for all specialists and trainees entrusted with the care of children presenting with ocular conditions Across 17 comprehensive yet concise chapters this book provides an overview on a number of typical pathologies including trauma infections inflammations and tumors Organized into five sections each chapter is written to relay broad insight into the common ophthalmic conditions that may bring a child in for an acute healthcare visit Additionally skillfully written text is further supplemented by many high quality images including clinical photographs fundus images radiographs and intraoperative photos Pediatric Ophthalmology in the Emergency Room meets the market need for a resource on this specific topic designed for trainee instruction It is a valuable text for medical students residents and fellows as well as anyone involved in the urgent or emergent care of children including ER physicians ophthalmologists optometrists and other personnel *AAV Gene Therapy: Immunology and Immunotherapeutics* Jose Martinez-Navio, Nicole K.
