2. Human geography focuses on people, their cultures, and the landscapes they create.
3. Other branches of geography examine specific aspects of the physical or human world.

Key Terms and Places

physical geography the study of the world's physical features, such as landforms, bodies of water, climates, soils, and plants

human geography the study of the world's people, communities, and landscapes

cartography the science of making maps

meteorology the study of weather and what causes it

Section Summary**PHYSICAL GEOGRAPHY**

The field of geography has many branches, or divisions. Each branch has a certain focus. No branch alone gives us a picture of the whole world. When looked at together, the different branches help us understand Earth and its people better.

Geography has two main branches: physical geography and human geography. **Physical geography** is the study of the world's physical features, such as landforms, bodies of water, and weather.

Physical geographers ask questions about Earth's many physical features: Where are the mountains and flat areas? Why are some areas rainy and others dry? Why do rivers flow a certain way? To get their answers, physical geographers measure features—such as heights of mountains and temperatures of places.

Physical geography has important uses. It helps us understand how the world works. It also helps us predict and prepare for dangers, such as big storms.

What do the different branches of geography help us do when they are looked at together? Underline the sentence that answers this.

List the two main branches of geography:
