Making Public Policy Decisions Damon Alexander, Jenny Lewis, 2014-12-05 To understand public policy decisions it is imperative to understand the capacities of the individual actors who are making them how they think and feel about their role and what drives and motivates them. However the current literature takes little account of this preferring instead to frame the decisions as the outcomes of a rational search for value maximising alternatives or the result of systematic and well ordered institutional and organisational processes. Yet understanding how personal and emotional factors interact with broader institutional and organisational influences to shape the deliberations and behaviour of politicians and bureaucrats is paramount if we are to construct a more useful nuanced and dynamic picture of government decision making. This book draws on a variety of approaches to examine individuals working in contemporary government from freshly trained policy officers to former cabinet ministers and prime ministers. It provides important new insights into how those in government navigate their way through complex issues and decisions based on developed expertise that fuses formal rational techniques with other learned behaviours memories emotions and practiced forms of judgment at an individual level. This innovative collection from leading academics across Australia Europe the United Kingdom and North America will be of great interest to researchers educators advanced students and practitioners working in the fields of political science public management and administration and public policy.

The Oxford Handbook of Foreign Policy Analysis Juliet Kaarbo, Cameron Theis, 2024-01-17 The Oxford Handbook of Foreign Policy Analysis repositions the subfield of Foreign Policy Analysis (FPA) to a central analytic location within the study of International Relations (IR). Over the last twenty years IR has seen a cross theoretical turn toward incorporating domestic politics decision making agency practices and subjectivity the staples of the FPA subfield. This turn however is underdeveloped theoretically empirically and methodologically. To reconnect FPA and IR research this handbook links FPA to other theoretical traditions in IR takes FPA to a wider range of state and non state actors and connects FPA to significant policy challenges and debates. By advancing FPA along these trajectories the handbook directly addresses enduring criticisms of FPA including that it is isolated within IR it is state centric its policy relevance is not always clear and its theoretical foundations and methodological techniques are stale. The Oxford Handbook of Foreign Policy Analysis provides an inclusive and forward looking assessment of this subfield. Edited and written by a team of world class scholars and with a preface by Margaret Hermann and Stephen Walker the handbook sets the agenda for future research in FPA and in IR. The Oxford Handbooks of International Relations is a twelve volume set of reference books offering authoritative and innovative engagements with the principal sub fields of International Relations. The series as a whole is under the General Editorship of Christian Reus Smit of the University of Queensland and Duncan Snidal of the University of Oxford with each volume edited by specialists in the field. The series both surveys the broad terrain

of International Relations scholarship and reshapes it pushing each sub field in challenging new directions Following the example of Reus Smit and Snidal s original Oxford Handbook of International Relations each volume is organized around a strong central thematic by scholars drawn from different perspectives reading its sub field in an entirely new way and pushing scholarship in challenging new directions

Neutrosophic Sets and Systems, vol. 74/2024 {Special Issue: Advances in SuperHyperStructures and Applied Neutrosophic Theories} Florentin Smarandache, Mohamed Abdel-Basset, Maikel Leyva-Vázquez ,2024-12-16 This volume contains the proceedings of the conference held at the University of Guayaquil on November 28 and 29 2024 featuring contributions from researchers representing Colombia Cuba Ecuador Spain the United States Greece Japan Mexico and Peru The conference focused on SuperHyperStructures and Applied Neutrosophic Theories commemorating the 30th anniversary of neutrosophic theories and their extensive applications The topic of SuperHyperStructures and Neutrosophic SuperHyperStructures explores advanced mathematical frameworks built on powersets of a set extending to higher orders SuperHyperStructures are constructed using all non empty subsets of while Neutrosophic SuperHyperStructures incorporate the empty set representing indeterminacy These structures model real world systems where elements are organized hierarchically from sets to sub sets and beyond enabling the analysis of complex and indeterminate relationships

Shocks and Political Change William R. Thompson, Thomas J. Volgy, 2023-05-16 Political shocks have come to be considered highly salient for explaining major changes to international politics and to the foreign policies of states Such shocks can occur at all levels of analysis domestically dyadically regionally or globally They range from political phenomena such as coups and wars to ecological catastrophes These shocks are sufficiently disruptive to cause foreign policy makers to reconsider their foreign policy orientations and to contemplate major changes to their policies In fact some have argued that it is mostly through political shocks that fundamental policy change occurs in most states No wonder then that political shocks are now increasingly part of the toolbox of considerations used by foreign policy and international relations scholars as they focus on understanding patterns of conflict and cooperation between states Given the salience of political shocks to understand foreign policy change this book brings together a group of both senior and more junior scholars whose previous work has shown substantial promise for moving forward theory and empirical analysis Their combined efforts in this book highlight the value of multiple theoretical and empirical approaches to a clearer understanding of the nature of political shocks and their consequences for foreign policy and international politics
