Developments in Engineering Geology M.J. Eggers, J.S. Griffiths, S. Parry, M.G. Culshaw, 2016-10-12 Developments in Engineering Geology is a showcase of the diversity in the science and practice of engineering geology All branches of geology are applicable to solving engineering problems and this presents a wide frontier of scientific opportunity to engineering geology In practice diversity represents a different set of challenges with the distinctive character of the profession derived from the crossover between the disciplines of geology and engineering This book emphasizes the importance of understanding the geological science behind the engineering behaviour of a soil or rock It also highlights a continuing expansion in the practice areas of engineering geology and illustrates how this is opening new frontiers to the profession thereby introducing new knowledge and technology across a range of applications This is initiating an evolution in the way geology is modelled in engineering geohazard and environmental studies in modern and traditional areas of engineering geology

Engineering Geology David George Price, 2009 This text is directed at the heart of Engineering Geology where geology is used to identify potential problems arising from ground conditions It describes how to investigate those conditions and to define an engineering response that will either avoid or reduce or even eliminate the problems revealed The book presents the big picture that is so often lacking when only site details are available but necessary for adequate engineering solutions

The Peter Fookes Engineering Geological Legacy in Geomodels, Geomaterials and Geomorphology J.S. Griffiths, D.P. Giles, J.A. Davis, J.J. Dunlop, 2025-11-04 This book is a celebration of the life work and legacy of Professor Peter G Fookes 1933 2020 As a professional engineering geologist he worked in over 100 countries produced some 200 publications and was instrumental in setting up MSc programmes at Imperial College and Queen Mary College London From the Geological Society he was awarded the William Smith Medal 1985 and was the first recipient of the Glossop Medal 1996 Although a mainstream geologist his background in chemistry ensured he was at the forefront in concrete research and the use of geomaterials Working with academic geomorphologists notably Denys Brunsden David Jones John Doornkamp and Sir Ron Cooke he led the development of engineering geomorphology as a genuine adjunct subject to engineering geology In addition his Glossop Lecture set engineering geology along the path of developing geomodels for use in understanding the ground conditions pertaining to engineering construction
