Abstract. The article discusses the role of the state in the development of the economy of the Republic of Kazakhstan. It is shown that the state plays a significant role in the formation of the economic system, ensuring its stability and growth. The author analyzes the impact of government policies on various sectors of the economy, highlighting both achievements and challenges. The study concludes that a balanced approach involving state intervention and market mechanisms is essential for sustainable economic development in Kazakhstan.

Discussion: It would appear a combination of these marketing strategies, along with other initiatives, helped the mall with a successful fourth quarter. It would appear an additional marketing strategy to create the combination products might have been successful with:

Discussion: EGF is an essential stimulant for proliferation and differentiation of epithelial cells. One of the differentially active regulators, ERK1/2, plays a major role in a signaling pathway downstream of EGF. These kinases are phosphorylated and translocate into the nucleus to regulate cell growth. The observed effect of ERK1/2 inhibitors on proliferation and differentiation of EGF-treated cells suggests that downstream targets of EGF-induced signaling include ERK1/2.
