The Asia Pacific Economic Cooperation (APEC) was founded in 1989. Since then, the forum has developed into a major player in tripartite relations between North America, East Asia and Europe. The Seattle and Bogor Summits were landmark events suggesting to many observers a gravitational shift in the world economy and world politics. Yet the Asian financial crisis had a sobering effect on high flying expectations as APEC contributed little to crisis management. In the light of such contradictory performance, distinguished scholars here examine APEC's achievements and failures, its role and functions in international relations, its linkages with regional organisations and the interplay between the forum and national interests of major factors in the region. **The Crisis**, 1942-07. The *Crisis*, founded by W. E. B. Du Bois as the official publication of the NAACP, is a journal of civil rights, history, politics and culture and seeks to educate and challenge its readers about issues that continue to plague African Americans and other communities of color. For nearly 100 years, *The Crisis* has been the magazine of opinion and thought leaders, decision makers, peacemakers and justice seekers. It has chronicled, informed, educated, entertained and in many instances set the economic, political and social agenda for our nation and its multi-ethnic citizens.
