The Right Place Arturo Bris, 2021-07-28 The Right Place explains why firms succeed in one country and fail in another irrespective of their inner drivers and suggests potential initiatives that governments can take to help the private sector create jobs and consequently make their countries more prosperous The competitiveness race is not unlike a cycling race If you want to ride fast you need three things a good bike to be in good shape and a smooth and fast road In a collaborative model you might say the business is the bicycle the business leader is the cyclist and the road is the government and the external environment The responsibility of a government is to design and build the best possible road It turns out that when the road is good good cyclists suddenly appear and want to race on it In this book competition and macroeconomics expert Arturo Bris provides the analysis of country competitive performance based on 30 years advising countries on this topic The typical mistakes that countries make are revealed and the pillars necessary in building a competitive economy economic performance as a necessary condition for prosperity government efficiency so the public sector can create the conditions for a productive

economy business efficiency so companies can create jobs and infrastructure both tangible and intangible so businesses and individuals can operate efficiently With contemporary case studies throughout the book provides an illuminating read for politicians business leaders and students of macroeconomics **Forthcoming Books** Rose Arny,1998 Macroeconomics Olivier Blanchard,David R.
