2007 Stones And Bones Mark Scheme:

Stone Tools and Fossil Bones Manuel Domínguez-Rodrigo, 2012-03-26 International archaeologists examine early Stone Age tools and bones to present the most holistic view to date of the archaeology of human origins **Interdisciplinary Approaches to the Oldowan** Erella Hovers, David R. Braun, 2009-03-08 An understanding of the uniquely human behavior of stone tool making tackles questions about hominins ability to culturally transmit and expand their base of social and practical knowledge and their cognitive capacities for advanced planning The appearance of stone tools has often been viewed as a threshold event impacting directly and profoundly the later course of cultural and social evolution Alternatively it has been understood as a prelude to significant succeeding changes in behavioral social and biological evolution of hominins This book presents a series of recent enquiries into the technological and adaptive significance of Oldowan stone tools While anchored in a long research tradition these studies rely on recent discoveries and innovative analyses of the archaeological record of ca 2 6 1 0 million years ago in Africa and Eurasia dealing with the earliest lithic industries as manifestations of hominin adaptations and as expressions of hominin cognitive abilities **Making a Mark** Andrew Meirion Jones, Marta Díaz-Guardamino, 2019-03-31 The visual imagery of Neolithic Britain and Ireland is spectacular While the imagery of passage tombs such as Knowth and Newgrange are well known the rich imagery on decorated portable artefacts is less well understood How does the visual imagery found on decorated portable artefacts compare with other Neolithic imagery such as passage tomb art and rock art How do decorated portable artefacts relate chronologically to other examples of Neolithic imagery Using cutting edge digital imaging techniques the Making a Mark project examined Neolithic decorated portable artefacts of chalk stone bone antler and wood from three key regions southern England and East Anglia the Irish Sea region Wales the Isle of Man and eastern Ireland and Northeast Scotland and Orkney Digital analysis revealed for the first time the prevalence of practices of erasure and reworking amongst a host of decorated portable artefacts changing our understanding of these enigmatic artefacts Rather than mark making being a peripheral activity we can now appreciate the central importance of mark making to the formation of Neolithic communities across Britain and Ireland The volume visually documents and discusses the contexts of the decorated portable artefacts from each region discusses the significance and chronology of practices of erasure and reworking and compares these practices with those found in other Neolithic contexts such as passage tomb art rock art and pottery decoration A contribution from Antonia Thomas also discusses the settlement art and mortuary art of Orkney while Ian Dawson and Louisa Minkin contribute with a discussion of the collaborative fine art practices established during the project The Trace-Fossil Record of Major Evolutionary Events M. Gabriela Mángano, Luis A. Buatois, 2016-11-17 This volume addresses major evolutionary changes that took place during the Mesozoic and the Cenozoic These include discussions on major evolutionary radiations and ecological innovations on land and at sea such as the Mesozoic marine revolution the Mesozoic radiation of vertebrates the Mesozoic lacustrine revolution the Cenozoic

radiation of mammals the evolution of paleosol biotas and the evolution of hominins The roles of mass extinctions at the end of the Triassic and at the end of the Cretaceous are assessed This volume set provides innovative reviews of the major evolutionary events in the history of life from an ichnologic perspective Because the long temporal range of trace fossils has been commonly emphasized biogenic structures have been traditionally overlooked in macroevolution However comparisons of ichnofaunas through geologic time do reveal the changing ecology of organism substrate interactions The use of trace fossils in evolutionary paleoecology represents a new trend that is opening a window for our understanding of major evolutionary radiations and mass extinctions Trace fossils provide crucial evidence for the recognition of spatial and temporal patterns and processes associated with paleoecologic breakthroughs **Dental Anthropology** Simon Hillson,2023-08-17
