Race and College Admissions Jamillah Moore,2024-07-29 In the United States elite colleges and universities have historically catered primarily to wealthy predominantly white Americans creating barriers to entry for students of color Legal statutes have entrenched discriminatory practices within the admissions process perpetuating the underrepresentation of students of color at top tier institutions Given this reality the imperative for institutions to promote diversity through affirmative action remains crucial However recent legal challenges against affirmative action threaten to reinforce the status quo potentially perpetuating the dominance of predominantly white institutions in higher education This book takes an historical look at the pivotal role affirmative action has played in higher education It examines the admissions process through the eyes of a beneficiary of affirmative action and is the first text to share insights on the role eligibility plays in allowing universities to consider race in admitting applicants Detailed are the different types of affirmative action and how some colleges and universities use the policy as a tool to consider race and ethnicity as part of a holistic evaluation of applicants This work makes the case that race conscious admissions practices remain necessary in the fight for racial equity in higher education

Regulation and the Performance of Communication and Information Networks Gerald R. Faulhaber, Gary Madden, Jeffrey Petchey, 2012-01-01. Due to their economic characteristics and also to their consequences on many aspects of collective life information networks have always been at the edge of regulatory innovations and at the center of policy debates. The contributors of this volume combine long term visions of the factors determining regulatory policies with up to date analyses of technicalities to be dealt with to provide the reader with an extended understanding of the issues and constraints shaping the future of digital networks. Eric Brousseau Universit Paris Dauphine France and the European University Institute Italy. Digital markets worldwide are in rapid flux. The Internet and World Wide Web have traditionally evolved in a largely deregulated environment but recently governments have shown great interest in this rapidly developing sector and are imposing regulations for a variety of reasons that are changing the shape of these industries. This book explores why the industrial organization of broadband ISPs Internet backbone providers and content application providers are in such turmoil. The expert contributors straddle the turbulent past of the telecoms sector and also contribute to its exciting though unpredictable future via positive analysis of past communications policies which is then utilized to deduce lessons to guide future policy making decisions. It is illustrated that broadband ISPs no longer simply provide a conduit for service delivery they are also involved in producing content and transaction services themselves in competition with content and delivery providers. The blurring of the traditional lines between these three sectors as each enters into the others markets is highlighted. The conclusion is that we are witnessing the emergence of powerful competing platforms linked in complex ways that challenge traditional economic analyses. Exploring governance issues regulation and investment next generation service markets and wireless communication this book will prove a fascinating and illuminating read for scholars researchers post graduate students and policymakers with an interest in ICT technology and innovation economics and industrial organization.
